Adultery Emerges As Issue U.S. Candidates **Face Questions On Private Lives**

Compiled by Our Staff From Dispatches WASHINGTON - Gary Hart's departure from the U.S. presidential race because of reports of womanizing has made adultery an issue in the campaign, and candidates faced questions about their attitudes Sunday in televised interview

The Miami Herald, meanwhile, reported that one of its photogra-phers apparently had corroborated one part of Mr. Hart's version of events at his Washington town-house on May 1 and 2. The report called into question a key portion of the newspaper's initial account. Senator Joseph R. Biden Jr., Democrat of Delaware, was asked on the ABC program "This Week with David Brinkley" if he would give a reply if asked if he had ever committed adultery.

Mr. Biden said he would answer, "It is none of your husiness.

Senator Albert Gore Jr., Democrat of Tennessee, who has already declared for the 1988 race and appeared on the same program, said he agreed. Mr, Biden is expected to formally announce his candidacy

Mr. Hart, a former Democratic senator from Colorado, ahandoned the campaign Friday following reports that a woman spent the night in his Washington townhouse the previous weekend while his wife, Lee, was in Denver,

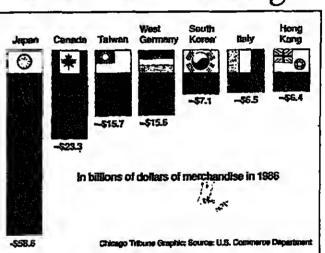

Mr. Biden asserted that the news media "got a little out of hand." But he added, "We the candidates cannot measure what is good taste and bad taste on your part."

Representative Richard A. Gephardt of Missouri, a Democratic candidate, was asked on NBC's "Meet the Press" whether he would See POLITICS, Page 2

Breakthrough **On Electricity**

NEW YORK (AP) - Re-searchers at IBM have found a way to make superconductors carry 100 times as much current as before, eliminating a major technical obstacle to widespread use of the new materials, it was disclosed Sunday.

The discovery demonstrates the possibility of using new superconducting materials for things such as improved computer chips and power trans-mission lines, IBM said. Superconductors lose all resistance to electricity below a certain temperature.

8 IRA Dead Are Mourned **By Marchers**

Compiled by Our Staff From Dispatche BELFAST - Several thousand supporters of the outlawed Irish Republican Army marched Sunday through Belfast to mourn eight guerrillas shot and killed in an ambush Friday night by British securi-

ty forces. The parade had been organized in memory of 10 IRA prisoners who died of self-imposed starva-tion in the Maze prison in 1979, but was overshadowed by the killing of the eight IRA guerrillas in a gun battle in Loughall, County Armagh, after they attacked a police station in the village.

Meanwhile, a senior member of the IRA told Reuters that the organization could try to assassinate British political leaders to avenge the deaths of the eight guerrillas.

"People in Britain with explo-sives are ready to go into action," the IRA member said Saturday. "British leaders shouldn't sleep casy in their beds."

The IRA gunmen were killed in an ambush set by commandos from the Special Air Service regiment, which acted on information from an informant.

It was the worst single setback to the IRA in its campaign to remove the British from Northern Ireland. The police said a motorist also was killed and his passenger criti-cally injured during the 10-minute

battle. They said two policemen

and a soldier were wounded. The IRA gummen rammed the gates at the Longhgall police sta-tion, using a bulldozer with a bomb attached to the machine's scoop. The bomb leveled part of the station. A group of masked gunmen then jumped from a van to attack the station but were ambushed by

the security forces. Police sources said that undercover agents had been tracking lo-cal IRA guerrillas for six weeks and had followed them when they went to an abandoned farmhouse to pick up the bomb used in the attack. After the attack began, two of the guerrillas were shot and killed in the van and the others were See IRA, Page 2

Barbie Trial's Emotional Eve Groups Honor Nazis' Victims, Countering Rightists

By Julian Nundy nonal Herald Tribun

LYON - Two demonstrations honoring the victims of Nazism were held here Sunday on the eve of the trial of Klaus Barbie. More than 40 lawyers representing 115 victims of World War II repression in the Lyon area

traveled en masse to sites where Barbie is alleged to have committed atrocities. Barbie's trial on charges of crimes against humanity opens Mon-

About 200 Jews demonstrated at a makeshift monument, modeled on Jerusalem's Yad Vashem memorial, that was set up opposite the city hall in memory of the Nazi extermination of Jews.

The two demonstrations, organized long in ad-vance, came after a small group of young ultra-rightists protested the trial of Barbie, 73, a former Gestapo captain in Lyon. On Saturday, at the end of a traditional annual

march in memory of Joan of Arc, a group of blackshirted youths shouted slogans in support of Barbie, who faces a maximum life sentence for his part in the Nazi occupation.

While winnesses emphasized that the rightist marchers numbered only a few dozen, Georges Bastelica, the Lyon police chief, said he was considering asking for extra reinforcements from outside the city to ensure security.

"Two weeks ago, I was not worried." Mr. Baste-lica said. "But now I am. I am afraid of extrem-

About 300 police officers had already been sent to Lyon to help maintain security. Of these, 20 will form Barbie's personal bodyguard during the trial, which is scheduled to last through June.

Because of his age, the Lyon courthouse has been equipped with a special area where Barbie can receive medical attention. Only a court doctor and his lawyer will have access to him there.

At the trial, Jacques Vergès, the defense lawyer. has threatened to confront the French with their record of collaboration with the Nazis, turning the trial into a traumatic experience for the whole nation.

All last week, the French press was filled with witnesses' accounts of wartime confrontations with Barbie. Mr. Vergès has described the media attention as an atmosphere of "lynching."

On Wednesday, the state prosecutor in the trial, Pierre Truche, appealed for calm and issued a reminder that the accused, who was sentenced to See BARBIE, Page 5

the U.S. trade deficit now running at \$170 billion a year will be cut to a more manageable level. The only question is how. Through a global adjustment of economie policies in which all major countries participate, or in a brawl among them that will probably wreck the postwar environment of multilateral coopcration?

That, in brief, is the issue that policy makers must resolve in their series of spring meetings that will culminate early next month in Venice, at the annual economic summit of the heads of state of the world's degree, had grown rich selling into seven leading industrialized na-LIORS.

In preparation for that encoun ter, officials will attend the OECD ministerial meeting here. The organization's secretariat postwar system of fixed but adjust-

has already prepared bad news for them. Although confined to a dip-lomatic phrasing, required of all international bodies, the OECD ed - that if stronger growth appears elusive, all that has been done" over the past few years to reduce inflation and set the stage for a healthier growth environment might well be jeopardized."

Were that to happen, the report warns, "it would become inevitable that within countries and between countries frictions, misunderstandings and tensions would multiply." What that means is a disintegration of the postwar system of international cooperation into competing power blocs, each fighting for expon markets and struggling to maintain living standards that had

come to be taken for granted. This is an abyss that the industrial powers have already faced once. It was just about 20 years ago, in the midst of the Vietnam conflict, that a war-weary, inflation-prone, deficit-ridden United States began to dispute with its partners in Western Europe and Japan the rights and obligations of each in maintaining the international monetary SVStem_

Bonn to Begin Census With Boycott Expected By at Least 2 Million

By Robert J. McCarmey

Washington Post Service BONN - Nobody knows how many people live in West Germa-ny, and the national census that begins this week may not answer

the question. At least two million residents plan to boycout or sabotage the survey, according to polls sponsored by the government, on the advice of a grass-roots coalition united under the slogan, "Only sheep are counted."

The Greens party helped to sponsor the loosely organized movement, which has a leftist orientation. The boycout campaign has infuriated the authorities.

The police, acting under a law requiring citizens to cooperate with the census, have confiscated anticensus leaflets in raids on offices of the coalition throughout the coun-

try. The city of Bonn has levied fines of \$4,600 apiece on 19 Greens members of parliament who held up a hanner that said "Boycott the Census" outside the legislature on Feh. 18.

On Wednesday, the first of 600,000 part-time census-takers will begin going donr to donr to distribute the census forms. The official "census day" is May 25. which means that one's age, residence and other data are to be recorded as they are on that day.

The coalition contends that the 33-question survey invades people's privacy. It also maintains that a census is

not needed, because all West Germans already must register their names and addresses with municipal authorities.

\$15 million publicity campaign, including television and radio advertising to convince people that it needs the data to plan for pensions. housing, employment and environmental protection.

The last census was in 1970. The population is believed to have begun failing in 1974 due to a low to collection centers, so that it is birth rate, and some experts say the government's official estimate of 61 million residents is as much as two million too high.

"Our interpretation is that the census requires a kind of kowtowing by the citizens to the government." said Uwe Guenther, a legal adviser to the Greens' parliamentary delegation. "Officials have the power to force people to do something that makes no sense at all."

A substantial number of conservative citizens sympathize with this

As recently as January, the government said that opinion surveys showed that 60 percent of the population was unwilling to answer all of the census questions.

However, Helmut Broudre, the head of the government's census publicity campaign, said that this was partly due to several widespread misperceptions.

IRA: March in Belfast

He said that according to opinion surveys, many West Germans were under the mistaken impresthat the census-takers would ask them how much money they camed.

Many also feared that the authorities would be able to match names with data, he said. However, according to Mr. Broudre, a person's name will be recorded on a Dage separate from the questionnaire itself, and the page with the name will be torn off before the data is entered into the computer. Names are to be used only for comparison with the municipal registers to confirm that each house bold has responded, he said.

After the government's publicity campaign. surveys indicated that 85 percent of the population planned to answer all of the quesnons, Mr. Broudre said. From 3 percent to 5 percent said they would boycott the survey, and the rest have not made up their minds, he said.

However, a margin of error of up to 5 percent is potentially signifi-cant. If the Federal Statistics Office is right in estimating that 61 million people live in West Germany, then a 5-percent error would represent

more than three million people. A Frankfurt publisher has sold more than 200,000 copies of a book describing how to give false information to census-takers without breaking the law. Citizens face fines of up to \$5,500 for obstructing the census, but government of-ficials have said that they are likely to prosecute only those who organized the boycott

The Computer Chaos Club, an anti-census group based in Ham-The government has mounted a hurg, "warns" people not to spill 15 million publicity campaign, in-coffee on the questionnaire. Above all, it says, do not smudge the form with graphite, of the sort available in automobile supply stores for use against rust, because it would

> The Greens want their supporters to hand in blank census forms possible to get an accurate measure of the extent of the boycott.

LONDON - Prime Minister Margaret Thatcher held final consultations with senior ministers Sunday as Britain awaited her decision on whether to call a general election for June.

As Mrs. Thatcher met with seven key advisers at Chequers, her country retreat, all signs indicated that she had chosen June 11 as the date that she will ask voters for a third

consecutive term in office. Her governing Conservative Party made a strong showing Thursday

comfortable lead over the opposition in public opinion polls, Mrs. Thatcher would be starting as a favorite as she seeks to extend her mandate by five years. The prime minister is expected to

Downing Street in London to Buckingham Palace to meet with Queen Elizabeth II and request the dissolution of Parliament so that an election can be held.

tion, she is likely to urge voters during her campaign to consolidate her efforts to put emphasis on free-

market forces and diminish the role the 391 seats that the Conservatives for the state.

If she wins, her government is House of Commons, likely to accelerate its program of denationalizing governmentowned companies and restricting the power of labor unions.

Judging from recent polls, Mrs. Thatcher would enter the campaign with a lead of about 10 percentage points over the Labor Party and 14 or 15 points over the Liberal-Social

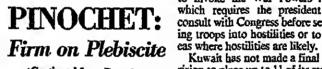

Democratic Alliance. If she retained that lead, Mrs. Thatcher would be returned to office with an overall parliamentary the figure has been falling in recent majority that is only slightly below months.

now hold in the 650-member

Her campaign would be likely to benefit from the publication Thursday of employment figures, which are expected to show that the num-

ber of jobless has fallen further toward the three million-mark. The number of unemployed has

more than tripled since Mrs. Thatcher took office in 1979 and is now at about 3.1 million, just over 11 percent of the work force. But

Iran Rejects Shultz's Call For Pullout, Warns U.S.

The Associated Press NICOSIA - The Iranian Foreign Ministry warned the United States on Sunday that it would suf-fer "irreparable defeats" if it made any hostile moves against Iran. Tehran's official news agency reported.

The agency, monitored in Nico-sia, assailed a statement by George P. Shultz, the U.S. secretary of state, warning Iran to accept United Nations Security Council reso-lutions calling for a cense-fire and a troop withdrawal, or face "appropriate enforcement measures." He made his comments after meeting a delegation from the Arab League in

Washington on Thursday. Washington has been intensifying efforts to reassure Arab nations that covert U.S. arms sales to Iran, disclosed in November, were a temporary shift in U.S. foreign policy that has since been reversed.

The Iranian statements coincided with a tour of Iraq and six other Arab countries of the Gulf region by Richard W. Murphy, the assis

tant U.S. secretary of state for Near Eastern and South Asian affairs. Mr. Murphy said in Oman on Saturday that Washington was not seeking to heighten tension in the Gulf. The United States deplored the Iran-Iraq conflict, he said, which had "gone on far too long." Iran and Iraq have been at war since September 1980. Iraq has called for a peaceful settlement, which Iran has rejected. Tehran insists that the war continue until the fall of President Saddam Hussein's government in Baghdad.

Iran Attacks Soviet Ship David B. Ottaway of The Wash-ington Post reported from Washing-

An Iranian attack last week on a Soviet freighter in the Gulf, the first against a Soviet vessel, appar-ently was a warning to both Moscow and Washington not to become more deeply involved on the side of Iraq and its Arab allies.

According to Lloyd's of Lon-don's shipping intelligence unit, the Soviet freighter was attacked by "small boats" at midday on Wednesday. The Soviet Union agreed last month to lease three

small tankers to Kuwait, an ally of Iraq, and promised military protection if necessary. Iran interpreted that as a hostile gesture.

The Soviet news agency Tass confirmed that a Soviet ship had been attacked and said that "serious damage was inflicted to the ship." But it said that no crew members were hurt, and gave no further details.

The Reagan administration is prepared to reach an accord with Kuwait providing for U.S. protection of Kuwaid oil tankers. Some U.S. lawmakers say such an agreement could significantly escalate U.S. involvement in the Gulf and perhaps require the administration to invoke the War Powers Act, which requires the president to consult with Congress before sending troops into hostilities or to ar-

cision to place up to 11 of its state-

Shamir Envoy Carries Appeal to U.S.

TEL AVIV (UPI) — A special emissary for Prime Minister Yitzhak Shamir left Sunday for Washington to attempt to win U.S. backing for a Middle East peace plan to counter Foreign Minister Shimon Peres's proposals for an international conference.

proposais for an international conference. There were no details of the plan carried by Yossi Ben-Aharon, director-general of Mr. Shamir's office. But as he left, an official in Mr. Peres's office insisted there was no real alternative to the international

conference. The maneuvering by both sides in Israel's coalition government came a day before the 10-man "inner cabiner," Israel's chief decision-making body, was to consider Mr. Pares's proposals. Political sources said it was divided 5-5 on the issue. Meanwhile, in Jersualem, mounted policemen used clubs Sunday to disperse about 1,000 demonstrators who clashed over the peace moves. The Associated Press reported.

Guatemala Rights Inquiry Is Urged

LONDON (AP) — The civilian government of Guatemala should investigate tens of thousands of human rights abuses committed under former military rulers, Amnesty International said in a report to be released Monday. It said such abuses had abated, hut that killings and abductions continued.

"A government cannot expect to ensure respect for human rights until it has rooted out the torturers and killers from its security forces," the

report said The London-based human rights group has complained repeatedly about abuses under military regimes in Guatemala and about slow progress under President Marco Vinicio Cerezo. Mr. Cerezo took office in January 1986. The report said there had been positive developments since then, but that an amnesty decreed by the last military leader, General Oscar Humberto Mejia Victores, "is being used to provide a shield of immunity for those responsible for past abuses and has effec-tively prevented their being brought to justice."

Forcign Minister Siddhi Savet-Moscow for the first of a series of talks over the next few months involving members of the Association of Southeast Asian Nations, the Soviet Union, the United States, Vietnam, and possibly China and the warring factions in

ASEAN comprises Brunei, Indonesia, Malaysia, the Philippines, Singapore and Thailand.

Nguyen Van Linh, leader of the Vietnamese Communist Party, is to visit Moscow later this month, Tass Mr. Linh, a prominent advocate

of economic reform, was appointed party leader in December. Indochina analysts say he appears to have consolidated his base of support in the party and government since then. He was quoted by Hanoi Radio

on Thursday as saying that his pre-decessors had left the country floundering without an economic and social strategy.

Foreign Minister Mochtar Kusumaatmadja of Indonesia said re-cently that Vietnam had brought in younger leaders who wanted to fo-

Japanese Question The Expulsion of Reporter by China

BELJING - Japanese diplomats are said to be shocked and frustrated over the decision to expel a Jap-anese reporter from China without

providing clarification or incrimi-nating evidence against him. The Chinese security police told . Shuitsu Henmi, 42, a reporter for Japan's Kyodo news agency, on Friday that he had violated Chinese laws by obtaining "national intelligence" information through illegal means. He was given 10 days to leave China.

An official at the Japanese Emlated the law,

The official said he was "shocked and saddened" by Mr. Henmi's exoulsion. He said the Japanese anthe Chinese action.

cus on their country's severe economic problems.

The new leaders appeared more amenable, he added, to a political solution of the conflict in Cambodia, which has been occupied by Vicinamese forces since 1978. Forcign Minister Suppiah Dhan-

abalan of Singapore said last week that diplomatic contacts initiated by ASEAN would reveal whether Vietnam's leaders were ready for a negotiated peace in Cambodia Victnam has been politically and economically isolated by most Western countries since it invaded Cambodia in 1978 and installed the government there in January 1979. Mr. Dhanabalan said if Vietnam wanted economic reconstruction, it must settle the Cambodian probiem to get cooperation from the DOD-Communist world,"

Western diplomats and other analysts in Southeast Asia said they had seen no indication so far that Hanoi had softened its determination to keep its forces in Cambodia at least until 1990.

Michael Leifer, a specialist in international relations at National University of Singapore, said there was "no sign that the new consensus on economic policy is being matched by a revised consensus on foreign policy, particularly over Cambodia."

He said Vietnamese leaders "still em to be holding to the position that it is absolutely essential for them to have both Cambodia and Laos in a very close political rela-

Indonesia is ASEAN's main point of contact with Vietnam on Cambodian issue, and Mr. Mochtar, Indonesia's foreign minister, has said he plans to visit Haooi next month.

Mr. Mochtar' said Friday that Mr. Siddhi, the Thai foreign minister, would inform Soviet leaders week that Indonesia was ready to bost an informal meeting of the Cambodian factions on national reconciliation.

He said this meeting could be followed by talks in Jakarta with Vietnamese participation. This was among a number of suggestions from ASEAN that Mr. Siddhi was expected to discuss in Moscow. U.S. officials and Western analysts said that on a tour of Indone-

sia, Australia and Indochina in March, Eduard A, Shevardnadze, -the Soviet foreign minister, made it bassy said he had been unable to clear that Moscow was not preobtain any clarification of how Mr. pared to use its political influence Henmi was supposed to have vio- and extensive, aid to Vietnam as

engers in a dirigible flying over the San Francisco Bay area. The blimp, owned by a British company in Oakland, California, makes several one-hour excursion flights daily.

TV Ministry Scandals Lampooned in South All across the Bible Belt of the U.S. South these days, country music radio stations are lam-

pooning the current troubles of television evangelists, The New York Times reports. On many stations the most requested song is "Would Jesus Wear a Rolex on His Television Show?"

"Would Jesus be political if He came back to earth?" goes the song by Ray Stevens. "Have His second home in Palm Springs and try to hide his worth?" On radio talk shows, in small-

town taverns and in roadside truck stops, the recent tales of sexual adventure, big salaries and profligate spending of fun-damentalists on television have provoked a derisive reaction that

has upset the evangelists. The Reverend Jerry Falwell, the Virginia evangelist who has taken over the scandal-ridden PTL, or Praise the Lord, television ministry, said that "national credibility for the cause of Christ

is at an all-time low." He added that "out there in the general public there's the inability to write that check because a lot of faith has been shat-

Short Takes

Dirigible flights for fare-paying passengers are being offered hy a British company, Airship Industries, in Oakland, California. They are the first such flights Hindenburg, a German zeppelin, exploded on May 6, 1937, on landing in Lakehurst, New Jersey. Thirty-six persons were killed in the accident. Only ex-

of \$150 for a one-hour ride around San Francisco Bay. But the company is seeking federal approval for point-to-point sersign polyester bag filled with nonflammable belium. The German airship had a rigid frame and was filled with explosive hydrogen

Half the people in a recent Gal-lup survey said they favored the financing of congressional election campaigns by taxpayers, with private contributions pro-hibited. Fifty percent of those polled were for the idea, 42 percent were against it and 8 percent were undecided. Public support for this change was highest in 1973, during the Watergate cri-sis, when 65 percent approved and 24 percent disapproved. Last year congressional cam-paigns cost more than \$400 mil-lion.

Members of several conservation societies in northern California plan to enter the state lottery for the 190 licenses being issued this year to shoot cougars. Each cotrant plans not to use the license, thus saving the life of a mountain lion for a year. Terry Mansfield, head of the California wildlife management division, said the state has no objections, adding, "It's sure to generate more revenue for lion research." The shoot was authorized because the number of cougars increased from 2,000 in 1971, when shooting them was first banned, to 5,000 today.

Cats now outnumber dogs as pets in the United States, 56 mil-lion to 51 million, according to MRCA Information Services, a market research company in Stamford, Connecticut, "People are staying single longer," said

Ellen Ryan Mardicks of the Pets Are Wonderful Council in Chicago, a private group. "They're staying in apartments in the city. They may marry and not have children immediately. Even if they have children, both spouses may work. There are more elderly people now than before. In this environment, cats are the preferred pet because they're more independent than dogs."

The Navesink Garden Club's notice in The Lincroft Village News in New Jersey announced a lunchcon speech by C. Antho-ny Tedesco, a floral designer. ny Tedesco, a floral designer The announcement, obviously spaced out, went on to say, "The luncheon will be gin at noon, followed by Mr. Tedesco's program, Spring Flowers. Fun and Fantasy.

Notes About People

Weinberger Proposes SDI Tests That Would Violate ABM Pact

By Michael R. Gordon New York Times Service

WASHINGTON — Defense Secretary Caspar W. Weinberger has sent President Ronald Reagan a report proposing four new tests that would violate the traditional interpretation of the 1972 anti-hallistic missile treaty, according to administration officials.

Building its case against the traditional and more restrictive view of the treaty, the Defense Department says in the report that the United States could save \$3 billion hy carrying out the four tests instead of holding to the current schedule of tests that seem to be clearly permitted in the treaty with the Soviet Union.

The report, which was not made public, also argues that information derived from the new tests would give policy makers more confidence in making decisions about whether to build anti-missile octenses. The report says the tests would cut hy two years the time needed 10 develop Mr. Reagan's Strategic Defense Initiative, officials said Saturday.

The Pentagon study urges that the Reagan administration adopt a plan 10 accelerate deployment of the space-based missile system. An official who supports the defense initiative said the tests would allow the United States to begin deploying the system, also known as "star wars." in 1995 or 1996.

The president requested the Defense Department report on new

the reports would help him decide tiative, said that the first of the whether the United States should experiments could take place as stop observing the traditional interpretation of the ABM treaty and formally adopt a new, hroader the report, a submarine would fire view. The broader interpretation of a target missile carrying dummy the treaty would permit expansion of the Strategic Defense Initiative to ioclude new space-based tests. Mr. Weinberger and other civilian Pentagon officials have been critical of the constraints imposed hy the ABM treaty. The Pentagon report was expected to argue that there are benefits in ahandoning

the traditional interpretation. Some administration specialists disputed the Pentagon report and said its conclusions were not strongly supported hy the analysis. They asserted that the traditional interpretation provided sufficient leeway for development of the space-based system. They also questiooed whether some of the new tests proposed by the Pentagon would be allowed even under

the hroader interpretation. The Pentagon study identifies cials who have reviewed the study. One of these is called THOR, which stands for Tiered Hierarchy Overlayed Research. THOR would

be a series of experiments testing U.S. capability to intercept missiles and dummy warheads during the main stages of flight. Interceptions

tests that could be carried out, and force of impact, rather than in an treaty.

new legal studies by the State De- explosion. One administration offipartment, in February. He hoped cial, who supports the defense inisoon as next year. In the second test proposed in warhcads and possibly decoys. This

experiment would test the use of space-based sensors and interceptor rockets. An official said that such a test could take place in 1989. A third test is the Laser Integrated Space Experiment. In it, a spacebased chemical laser would he tested in 1990, an official said.

In the fourth test, the sensor inte-grated discrimination experiment, a rocket would be fired from Vandenberg Air Force Base in California. A variety of space-based and other sensors would study whether warheads carried by this missile could be distinguished from decoys. Such a test could take place in 1990

Administration officials said the Pentagon report suggested that if the United States does not adopt the broad interpretation of the four new lests, according to offiforced to withdraw from the agreement to conduct its testing and development program.

The Senate Armed Services Committee voted on Tuesday to accept an amendment to a military spending bill that would block the main stages of flight. Interceptions administration from carrying out would be carried out using rockets tests that violate the traditional, that desuroy their targets with the restrictive interpretation of the

Alfonsín Seeks to Limit Trials

Urgency Grows as Military Tension Persists on Rights Cases

By Shirley Christian New York Times Service

growing sense of urgency in the government to find a legal mechanism to reduce the number of Argenuine military officers facing trial

on charges of human rights viola-tions, according to officials and others concerned with the issue. They said in recent interviews and public statements that internal tension remains in the army after a series of rebellions by mid-level of-

ficers last month. The rebellions, which were quieted only after the personal interven-

tioo of President Raul Alfonsin, were a response to efforts to prosecute officers for human rights violations committed a decade ago, when a military junta was conducting a war on subversion.

The expectation is that the government will ask Congress to approve an amnesty for the officers or law restricting the trials, or that Mr. Alfonsin will use his power to grant pardons after obtaining bi-

partisan support.

BUENOS AIRES - There is a path to take was likely to be made early this week. Analysis said that the political cost of any of those options might be high. They said that legislators want the president, who is highly popular, to bear most of the onus.

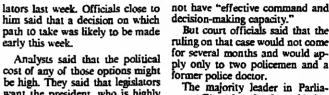

A significant faction of the opposition Peronist Party has already stated that it will not vote in Congress for anything resembling an amnesty.

Earlier this month, the Supreme Court ruled out an active role for itself in finding the solution. The court was seeking to quiet speculation that it would establish a legal

precedent by removing many officers from the threat of prosecution on the assumption that they were following orders. In a news release, the court said

that any ruling it might issue would apply only to a specific abuse, and could not serve as a precedent. In a brief filed Thursday in a case that is on appeal, Attorney

Mr. Alfonsin held a series of General Juan Octavio asked the meetings with ministers and legis- court to exonerate those who did

ment, Cesar Jaroslavsky, said that Mr. Octavio Gauna's brief might

serve as legal guidance for a legisla-tive or presidential act, however, Sources close to the military said that the issue of trials must be quickly resolved if the army's new leadership is to re-establish its

command structure. That chain of command was destroyed, they said, when the previous army leaders sought to put down the rebellions and encoun tered widespread disobedience by subordinate officers.

A retired army officer said that the army had "not recomposed itself" since the rebellions, which hroke out April 16 and continued for six day

He said that the new army chief of staff, General José Dante Caridi, "has to face reality and talk to the officers and tell them what Alfonsin and Argentina are offering the military.

The retired officer added that General Caridi would "have to go" if he could not solve the problem of trials to the satisfaction of most of the military.

which Mr. Caridi had to show "he has some cards to play" is Army Day, May 29, when the army chief traditionally makes a speech. Mr. Alfonsin has said since he ran for president in 1983 that there were varying "levels of responsibil-ity" for the human rights abuses, which caused the deaths of 9,000 people and included the torturing of thousands of others. After taking office, the president supported trials for those who commanded the armed forces during the era of ahuses, which ran from 1976 to 1983. Five of the nine former military commanders were convicted and are serving sentences ranging up to life in prison. The filing of charges against other military officers has proceeded more slowly. Each charge has depended on the speed with which the prosecutors could gather evidence and have the cases accepted in courts around the country. Last year, the government prosecutor asked the courts that were hearing cases against other officers and policemen to take into account whether they complied strictly with orders, whether they gave orders or whether they exceeded orders. But the courts were under no obligation to follow those guidelines. In December, after the president voiced concern that the trials were dragging on and creating tension in the armed forces, Congress approved a law setting a Feb. 22, 1987, deadline for the filing of charges in buman rights cases. But the law prompted a flurry of filings. The result is that as many as 450 men, mostly current or former military officers, are named in various investigations still continuing in the courts.

OPINION

Unless Governments Act

When the OECD ministers meet tomorrow, the prospects before them for the next few years will be poor - unless some governments take action. The world needs judicious shifts of policy to stimulate economic growth outside the United States. That means a mixture of more relaxed budget and monetary policies.

Page 4

There have been times when stimulus to demand has been unfortunate: often in Britaia, in France in 1981, and notably under the first Reagan administration. But this was because the dose was administered hy the wrong countries at the wrong time. or applied too forcefully. Isolated errors should not invalidate approaches to economic policy that can be helpful when applied wisely.

The OECD world - the richer countries - needs economic growth of some 3 percent just to stop present problems of unemployment and world deht from getting worse. Given the size of those problems today, growth should be even faster for a time. But the forecasts of the nonpolitical OECD staff fall well below the minimum need - unless policies change.

Unfortunately, few countries can move unless West Germany and Japan do so first, but both have so far stayed singlemindedly wedded to their amhitions no douht laudahle in the longer term - to get their budget deficits down. They have been oblivious of whether this is appropriate in the shorter term. Excessive concentration on the short term in the past

has swung to virtual neglect of it today. If economies continuously fail to grow at satisfactory rates, it is not just the dole queues and the debt failures that stretch out. The whole medium-term strategy of OECD countries is put at risk. A major aim of these countries is to introduce more flexibility into their economies, so that labor and capital move out of rustbelt sectors and into the expanding ones, and so that electorates no longer demand that when sales of teapots decline, the teapot industry be supported by subsidies and protection. Painful progress has been made away from the teapot syndrome, but flagging growth will put this at risk.

The OECD meeting will not be the first attempt to tackle these problems. This year has already seen failed meetings between the five, or seven, biggest countries, plus the latest empty Reagan-Nakasone assignment. It is not obvious that agreement between the major powers will be easier in the 24-country OECD forum. The smaller countries from Scandinavia, Benelux and the Antipodes may be constructive, hut they do not carry big guns.

Still. this week's OECD meeting could pave the way for more meaningful commitments at the summit of the seven hig-gest countries in June. If it does not — if we are just told to be patient - there will be further losses: of face for the statesmen and of faith by the markets. Neither commodity is in plentiful supply. Hedging Against Folly

The first arms control agreement that the uncertainties of intent and response that they Reagan administration has negotiated with the Soviet Union is a modest affair worth modest celebration. It would set up centers' in Washington and Moscow to give advance notice on nuclear and missile tests and major military exercises. It gives explicit form to the idea that the systematic exchange of information can serve the security of each side.

In hailing the agreement, President Reagan described it as a practical measure undertaken to reduce the risk of conflict, "particularly nuclear conflicts that might result from accident, misinterpretation or miscalculation." It is hard to see how this limited agreement to exchange information - information that already is routinely available and (some of it) routinely exchanged in another channel - will serve the deep and vital purpose of reducing nuclear risk. Still, it is useful for the president to underline the purpose. Presumably he views this agreement as something that can be huilt on.

Most public and official attention to arms control centers on regulating numbers and kinds of weapons. But by any sober reading, the keenest dangers of nuclear arms arise not from their simple existence hut from the

Washington already constitutes a "nuclear risk reduction center" and that it may be redundant to set up a separate office to handle some part of that basic national function. It is true, too, that no new mechanism or procedure can ensure a safer result. Yet there is comfort in knowing that good minds in both capitals are starting to work together to hedge against nuclear risk. The practical and hureaucratic hurdles are con-

siderable. The need is supreme, -THE WASHINGTON POST.

Patriots or Rogues?

The first week of Iran-contra hearings quickly displayed the harsh dilemma facing the Reagan administration. The testimony of the first witness, a retired Air Force general named Richard Secord, threw the untenable vate citizen hut clothed by the White House choice into sharpest relief: whether to describe those who participated in the Iran- American army and negotiate arms sales to contra affair as patriots or as rogues.

cord and most of those who will follow him and disavowed by the president - whose to the stand as patriots. The president, it will be recalled, has already declared Obver North to be a national hero. If they were patriots pursuing the national interest and doing the president's bidding, then the ad-ministration admits that it deliberately commerce with terrorist states like Iran and had hanned direct and indirect military aid to the Nicaraguan rebels. If, however, they of them inside the administration and some they were given such extensive support hy the Departments of State and Defense and the Central Intelligence Agency. Above all, it must explain why President Reagan and his cahinet officers could not or would not control their subordinates. General Second portraved himself as a parriet, ready to tell his story without resorting to Fifth Amendment protection. He insisted that he acted under White House orders. Yet this patriot halked at showing Congress the full finances of the operations. That makes all the more intriguing the fascinating trails of money and power that lie ahead. If so ostensibly willing a winess can

prevent Congress from fully tracking the money, what can the committees expect from the patriots or rogues who will follow?

General Secord was conscripted as a priwith the power to supply a small Central Iranian hostage holders. As a civilian, he The White House can label General Se-curried out missions forbidden by Congress

Farewell to Both Moderate Alternatives

J OHANNESBURG — White South Africans have chosen the path of Ian Smith. By their lurch to the right in last Wednesday's

general election, they demolished the hope that the country's racial conflict might be resolved by peaceful constitutional change. Instead, like Mr. Smith and his white Rhodesians, they chose to close ranks against their black fellow country-men and the world and to cling in white minority control for as long as possible. It is a course that will have the same inevitable

ending as it did with their northern neighbor. It will succeed for a while, but will produce the same cycle of violent resistance and repression. with increasing international isolation, that will slowly bleed the country to debilitation after causing much grief and hitterness. Which is why a dismayed Archbishop Desmond Tutu said on Thursday that South Africa had entered the "darkest age of its history." There have always been two theoretical possi-

bilitics for averting a racial civil war in South

Africa through negotiated constitutional change. One was by working through patient political pressure within the ruling National Party, which has been the strategy pursued for years by the Afrikaner verligte. These "enlightened" reformists figured that ethnic loyalty was such that the party could never be defeated at the polls, given, the Afrikaners' numerical dominance of the 4,600,000 white population. So the only realistic way to work for reform was to remain inside and

quietly try to influence the leadership. The second possibility, favored by the pre-dominantly English-speaking liberal opposition. was to try to promote a split in the National Party so that an alliance could be formed with the breakaway verligte that could win enough seats to take over the government and begin negotiations with the black majority.

Both notions have now been shattered. First to go was the verligte strategy. The defection of Denis Worrall, the former ambassador to Britain, and two other prominent verligte who ran for election as independents, together with a revolt in support of them by a large number of academics at Stellenbosch University, the intellectual fountainhead of Afrikaner nationalism, signaled a decision hy the verligte that the insider strategy was no longer viahle. The hrain-trusters of Stellenbosch had tried to

influence President P.W. Botha, and at first they thought they were succeeding. But as his complicated three-chamber parliamentary system for extending limited political rights to the "col-ored" (mixed race) and Indian minorines turned into a fiasco, as unrest broke out in the hlack townships and as the world turned to sanctions, Mr. Botha became more remote and autocratic, and they realized that his willingness to reform had always been strictly limited anyway.

Things came to a head at a bruising confrontarion last January when Mr. Botha told the Stel-lenbosch verligte in the bluntest terms to get lost. and they decided the strategy was futile. They went public with a spate of resignations and public statements. Their leader, Sampie Terreblanche, an economics professor, said he had finally reached the conclusion that the National Party could never be the instrument of reform.

By Allister Sparks

The demise of the insider strategy produced an upsurge of enthusiasm for the alternative. The advent of the independents was the split the liberals had been waiting for since the National Party first came to power in 1948. Colin Eglin, teader of the Progressive Federal

Party, shaped his entire electoral strategy around the prospect of being able to put together a "reformist alliance" which, he hoped, could enlarge the split and become strong enough to take over the government at the next election, which under the complicated three-chamber constitution is due in only two years' time.

He stood back for the independent candidates, formed an election alliance with the small and devitalized New Republic Party, which had once een a force in Natal province, and even left some

verligte National Party candidates unopposed as a ectener. The idea was that if the alliance could increase its representation and Mr. Worrall and the other independents could pull off a shock win or two, this might catalyze a breakaway by as many as 30 verligte members of Parliament whose disillusionment was said to be growing.

Last Wednesday this strategy not only collapsed, it was reversed. Thousands of white South Africans of British descent, alarmed hy internal unrest, external pressures and a National Party election campaign that deliberately shar-pened atavistic fears of hlack people and painted the Progressive Federalists as soft on security and communism, abandoned their traditional opposition to Afrikaner nationalism and threw in their lot with President Botha, And thousands equally alarmed Afrikaners moved from the National Party to the far-rightist Conservative Party of Andries Treumicht,

Lawrence Schlemmer, South Africa's leading opinion poll specialist, says it was the response of

Irangate: Will Congress Ask the Tough Questions?

By Scott Armstrong and Tom Blanton

WASHINGTON - How did the Reagan administration set up a massive private network not just in Iran and Central America hut around the world to implement secret foreign, military and intelligence policies outside the Constitution while Congress slept, as committee testimony and documents as well as the Tower report all indicate?

How did the administration fund dozens of these secret plans with foreign and private monies disguised as charitable contributions while the Department of Justice, the FBI, the DELAIC nue Service and - if he is to he believed --- the president all slept? Few commentators paid attention to the opening statements hy the members of the two congressional investigating committees last week. The networks even cut back to the soap operas. But those statements revealed deep conflicts within the committees. Some members wanted to wrap up the investigation quickly and get the scandal "behind us." Others staked out a high constitutional ground and implied that the systematic alterations of the constitutional balance should be addressed. The Senate committee's Republican vice chairman, Warren Rudman of New Hampshire, used the phrase "inexcusable fiasco of the first order" in

criticizing the independent counsel for in the Iran-contra affair, they should investigating "ad nauseam." Senator Rudman said Lawrence Walsh should begin hy asking the right questions. Consider the core issue of foreign not attempt to bring wide-ranging policy. How did more than a dozen U.S. conspiracy indictments against partic ipants in the Iran-contra affair, behundreds of government employees get embroiled in an elaborate, private-public nexis of secret and largely ilcause such counts would be difficult to prosecute. Instead, he advised, Mr.

Walsh should narrow his investigation to the simple counts of obstruction of justice that would restrict the scandal to the few months of last fall. The hurry-up advocates argue that inforce treat to know dictates quick immunity to key participants, quick investigations and hurried hearings. But such haste glosses over six years of abdicated congressional oversight, as the Reagan administration went "off the books" with any covert operation of which Congress or the American public might disapprove. Mr. Walsh headed in exactly this direction last week. Guilty pleas on conspiracy counts from conservative fund-raiser Carl Channell and public relations executive Richard Miller took the independent counsel through doors on which the congressional committees have not yet even knocked. Those guilty pleas could open conspiracy doors at the State Department and at the White House. If congressional investigators want his opening statement only days after to explore the issues that matter most

legal operations around the world? Did the seemingly unconstitutional use of the petrodollars of Saudi Ara-

bia, Brunei and Texas have its origins in other secret projects - aid to rebels

"an insecure electorate." He believes that sanc-tions contributed. This prompts the thought that symbolic punitive measures that cause indignation without being tough enough to compel compliance

arden attitudes rather than change them. The swing to the right all but wiped out the New Republicans, lost the Progressive Federalists a third of their seats and replaced them with the Conservatives as the official opposition. This has conservatives as the ornical opposition. This has changed the whole configuration of white politics. For years the hardy core of white liberals was the one thing that prevented the kind of mindless laagering of attitudes that occurred in Mr. Smith's Physical or attitudes that occurred in Mr. Smith's Rhodesia and other parts of Africa as white minorities there came under pressure. Now that core lies mortally wounded. It cannot recover, because the focus of white politics has shifted irrevocably to a struggle between the right and the far right.

to a struggle between the right and the far right. The verlight are now outsiders. The government has lost the influence of its intellectual elite. It will become captive of its own revived atavism while the main pressure will be from the large number of parliamentarians who now occupy marginal seats inder threat from the Conservatives.

Mr. Botha will still use the rhetoric of reform and claim that he has a mandate to proceed with it. and claim that he has a mandate to proceed with it. But his is a very specific concept of reform, a modernizing rather than a scrapping of apartheid. As David Welsh, professor of African Studies at Cape Town University, says: "There is no ques-tion now of the government talking to the African National Congress or of being prepared to relin-quish white minority control. It will press ahead with necessaritheid and sten un its Security actions with neo-apartheid and step up its security actions to crush all opposition to that." Mr. Botha said in his final campaign speech that

the government will discuss its reforms with "de-cent, well-balanced and peaceful" blacks. That excludes the entire spectrum of the United Democratic Front alliance, the popular community organizations and the trade unions.

They will talk about his complicated institutional congiomeration of city states, national states and self-governing states, of township councils, regional services councils and a national statutory council, all based on the principle of "own affairs"

administration under overall white control. No credible black leader will participate in these discussions. Certainly Chief Mangosuthu Buthelezi, the last of the credible moderates, will not. In a despairing response to the election results, Chief Buthelezi said he was "totally ap-palled" by the outcome, which had "all but

destroyed prospects of negotiation." Lacking any viable political solution, aban-doned by its intellectual elite and pinned down by a perceived threat from the right, the government will try to maintain control by repression and co-option - while white support continues. to consolidate and the position of the liberals becomes regarded as aberrant and treasonous. This will produce a rising graph of frustration, bitterness and radicalization in the hlack town-ships. As black leadership is driven underground, it is likely to turn in desperation to strategies of violence, which in turn will provide the pretext for greater repression. It is a bleak outlook.

Start Moves Back From The Brink By Jim Hoagland

M ADRID - Out of the wild gy-rations of the dollar, the year and the mark over 18 months come questions that now have to be answered by the politicians instead of the economists. What relationship do shifting currency values have to the accumulation or protection of na-tional wealth? Where does this tripar tite tango of currencies leave economie growth prospects?

Time was when exchange rate swoops and swings plaqued mostly the tourist cashing traveler's checks in Pi-cadilly. But American consumers got a whill of today's currency wars last month when Chairman Paul Volcker of the Federal Reserve nudged U.S. banks into raising their prime rate by a quarter of a percentage point. Mr. Volcker intervened specifically

to make dollar investments attractive abroad and to stop the battered greenback's continuing decline. But his ac-tion was also the clearest possible sign

The OECD ministers

will be told that bolder action is needed.

that the fundamental imbalances in the world economy have remained be-youd the reach of the currency-centered strategy directed by Treasury Secretary James Baker.

More currency problems, more U.S. interest increases and growing risks of recession are likely unless industrialized nations reach agreement on new economic strategies at two key moetings within the next month.

ings within the next month. Such agreement is economically at-tsimable. The American, Japanese and West German economics are strong enough to permit enlightened macro-economic policy-making. It is the ma-cropolitics of the sinuation that stink.

For 18 months the United States has unwisely focused on the bilateral aspects of a trade problem that is in its nature a global one. By manipulating the dollar at times against the yen, at times against the mark, as a substitute for convincing action on the U.S. budget deficits, the administration has continued to try to market a Philco solution for Sony-age problems.

The second part of Mr. Baker's campaign to head off protectionism in Congress and to get other countries to solve American problems is faring only slightly better. Again, the bilater-al focus on a global problem is ulti-mately self-defeating. Even if Japan and West Germany did all that Mr. Baker asks, and doubled their growth rates at the present levels of the Baker dollar, the U.S. trade deficit would probably dip no more than 10 to 15 percent in the next two or three years.

oath says be will faithfully execute the laws Within a few years, General Second amassed at least \$47 million hy selling American weapons at huge profits. His assets were swelled by donations from private citizens dunned hy the administration in the name of evaded the law. Congress had forbidden charity. Then, with the Iran-contra scandal about to explode, this patriot offered to sell back to the United States the assets it had already paid for. On the wimess stand he were rogues pursuing a private policy, some displayed still more nerve. He proposed giving the proceeds of his various transactions, outside, the White House must explain why proceeds still on deposit in his partner's name in Geneva banks, to the William J. Casey Fund for the contras. General Second still assumes that these are private funds that

> could be given to charity. The Second operation combined the worst of two worlds: covert abuse of government power and the private sector's independence from accountability. The challenge to Congress is already clear. How to write rules curbing potential patriots and rogues without crippling the power to deal flexibly with foreign policy? To learn what it must do, Congress needs first to learn much more about what has been done. -THE NEW YORK TIMES.

Other Comment

For and Against Muckraking

Gary Hart was not the first presidential hopeful suspected of having extramarital affairs, although he may be the last for the foreseeable future. John Kennedy was left alone by the press because he was generally discreet and was regarded as an aspiring politician of presidential caliber. Mr. Hart's extraordinary behavior, however, inevitably aroused journalists' muckraking instincts. He was flagrantly indiscreet and had yet to prove himself a suitable candidate. His flaw

found him out, which makes the case for muckraking journalism. The Miami Herald's story will rightly be remembered. - Louis Heren, The Sunday Times (London).

Hypocrisy, twin sister of puritanism, has been the dominant note in the revelations. -- El País (Madrid).

Narrow-minded morality can play a legitimate role in relations between individuals but is unfit to decide if someone is eligible for the responsibilities of the presidency. - De Volkskrant (Amsterdam).

in Alghanistan, and to Angolan rebels in violation of the Clark amendment, or support for counterterrorism activities in Lebanon and Libya?

How did the Constitution's allocation of responsibility to Congress to appropriate monies for governmental action get systematically supplanted hy secret official solicitations from third countries to pay for administra-tion policy? Once solicited, why were the funds not tracked? And once controlled and laundcred through private hank accounts, whose funds are they? What are the constitutional implications of the many other uses to which these funds were apparently put? Congress should ask similar ques-

tions about defense policy. To what extent do such military

arrangements abroad, secret as they were from Congress and the Ameri-

Hart: A Merciless Rush to Judgment

By Tom Wicker

N EW YORK - It was never clear that Gary Hart would be the Democratic nominee in 1988. His downfall and political demise are a sad spectacle, nonetheless.

Politically, even many who did not support Mr. Hart might have realized that he was the best prepared and hardest-working of the candidates - not, perhaps, in campaign exertions, hut in terms of the serious issues with which presidential elections should deal. In part because of his almost successful 1984 campaign, and in part because of his devotion to "new ideas"

about a new era of American life, have been further subordinated to no other candidate in either party has as yet shown Mr. Hart's scope, depth and intellectual vigor. His departure opens the way to other candidates — those already running, those who might now see

more opportunity or a greater re-sponsibility. The likelihood that Senator Sam Nunn of Georgia ultimately will enter seems enhanced. So is the slimmer possibility of a late-starting campaign by the most-talked-of noncandidate. Sentor Bill Bradley of New Jersey. As for New York's Governor Mario Cuomo, when he declared himself out he could be reasonably confident that the Democrats had an experienced and able alternative. Now that is much less clear. Mr. Cuomo might think that he has good cause to reconsider his position in the light of changed circumstances.

But if other candidates now see more opportunity, they may face

i,

4

more competition, with no candidate dominating the race. If so, the likelihood of a contested Democratic convention may increase although in the age of primaries that is still a remote prospeci. All those considerations are speculative and subject to events. But it seems altogether clear that presidential campaigning, already in so many ways demeaning to those who go through it, has been further trivi-alized. Questions of public policy personal matters. Imagery - of the

"family man," of the man of "values" - has been confirmed again, no matter how false, as the main matter. And once again a press that lays claim to a public service ethic has shown itself at least as attentive to sensation and scandal. That is not just a criticism of The

Miarui Herald for deplorable stakeout tacues which, if used by police agencies on political candidates, would be denounced by The Herald and most other press organs. Just as unsettling was the sight of the sharks, once the water was bloodied. Early polls showed the public as dubious about the press, in this case, as the voters were supposed to be about Mr. Hart. So editors and reporters may yet have cause to wonder where this kind of zeal leads. Who will be staked out next?

already filling news columns and air time, the conventional wisdom seems to be that Mr. Hart "selfdestructed," perhaps subconsciously doing so on purpose. His purported adventures with other women, it is endlessly said, showed irredeemably bad judgment in a presidential can-didate, proved Mr. Hart a "risk taker" who could not be trusted with presidential powers in a crisis, and demonstrated a fatally flawed character unworthy of the White House. That is all very glib. Some of it may even be true. Mr. Hart coned to had judgment in whatever happened with Donna Rice. At root, however, what destroyed him was not so much his judgment, questionable as it was, but the judg-

Every American had a right to make such a judgment - that a vomanizer" ought to be punished. at least could not be supported for president. But much of the talk about his judgment and character seems to me designed to put a good face on the intolerance of many who ignored the Biblical injunction to judge not, that ye be not judged."

past few days, Gary Hart has only himself to blame. For the fact that those troubles destroyed his presidential candidacy overnight in a merciless rush to judgment, an eager press and an avid public must ask themselves if they, too, might not now have much to regret, The New York Times.

How divisible are their quasi-official governmental roles from their private profit-making roles? To what extent were these elaborate procedures and arrangements primarily for the purpose of disguising them from Congress and the American people?

How do defense contracts come to include classified compartments for the funneling of covert operations funds? Who in the Pentagon or any

other agency audits those funds? To what extent are extensive secret attangements in covert arms sales duplicated in secret aspects of congresonally approved arms sales? Were big arms transfers to Saudi Arabia, Egypt, El Salvador, Honduras, Israei, Pakistan, South Korea, Taiwan and elsewhere used to disguise systematic diversions for intelligence, counterterrorism and other secret purposes? If the president and Congress con-

tinue to conveniently agree that the premier question is "What did the president know and when did he know it?" the deeper constitutional questions will not be addressed.

Unless Congress allocates the nec-essary time and effort to determine how far "off the books" security policy has gone, the newly uncovered publicprivate network formed to carry out secret policy will become a permanent feature of the constitutional system.

Mr. Armstrong is executive director and Mr. Blanton is director of planning and research at the National Security Archive, which has just published "The Documented Day-by-Day Account of the Secret Military Assistance to Iran and the Contras." They contributed this com-ment to The Washington Post.

tariat on the structural adjustments needed to cut governments free from politically based subsidies that encourage or protect inefficient farming and outdated industries. A commitment to wide-ranging structural reform would signal to the markets a new willingness to concentrate on the underlying problems of world trade.

And early next month the heads of the seven major industrial countries gather in Venice for an economic summit. Although these meetings normally provide little real impetus for change, Venice could serve as a dramatic exception. It is prohably a last opportunity for President Ronald Reagan, Prime Minister Yasuhiro Nakasone and Chancellor Helmut Kohl to show that they can overcome their domestic political weaknesses and divisions and make mitmal sacrifices that would be explained at home as necessary for reinvigorating the global economic balance.

Binding commitments from these to a program of tax increases and deficit reduction for the United States, trade reform for Japan and government leadership in West Germany that would restore investor confidence could persuade the mar-kets that these leaders have enough vision and strength to walk back from the economic brink.

But if Venice turns out to be politics as usual, we are looking at another full year or more of the world economy drifting like a rudderless vaporetto through the canals of cur-rency wars that benefit primarily the banks and the speculators.

An Unhappy Past Is on Trial As France Accuses Barbie

Preparing for Trial: Top. Barbie's lawyer, Jacques Verges, left; Presiding Judge André Cerdini, middle, and Fortunee Benguigui, a prosecution witness, with photo of her sons killed in Auschwitz. as a precaution. In every practical respect, however, his situation remained the same. He continued to live in a CIC safe house in Augsburg as a paid informant

In the summer of 1949, meanwhile, pressure in France to find Barbie was mounting. Resistance groups clamored for his arrest. The Barbie case entered diplomatic channels.

At a May 4 meeting at CIC headquarters in Frankfurt, Colonel Erskine decided that Barbie хоср French. Once more, events conspired to aid Barbie, for Major Browning, who would have objected to the decision, had been replaced as operations officer by a new man who was not familiar with the case. Again, the reasoning was that Barbie knew too much. A curious situation arose, in which the CIC single-handedly blocked Barbie's extradition by professing not to know where he was. By this time, the State Department was getting "strong notes" from the French demanding that Barbie be surrendered. The U.S. Embassy in Paris was embarrassed by charges that the Americans were harboring him. The U.S. High Commission for Germany, under John J. McCloy, suddenly had the Barhie case dumped in its lap. But when the commission queried the CIC about Barbie's whereabouts, the CIC said his employment bad been discontinued in May 1949 and that his whereabouts were unknown. In fact, Barbie remained in Augsburg through the summer and fall of 1950, recruiting agents and conducting interrogations. But the CIC bad painted itself into a corner. With the extradition process under way, if Barbie was picked up, the deception would be found out. Barbie became, in CIC parlance, a "difficult disposal case."

By Ted Morgan New York Times Service

The trial of Klaus Barbie opens Monday in the French city of Lyon, and when it does, it will take an act of will to reconcile the frail 73year-old man in the dock, whom one might imagine stooped over a flower bed in the garden of his retirement home, with the crimes he is accused of committing."

What, this kindly looking and rhenmy-eyed old widower, whose voice can barely rise above a whisper, was the SS captain in Lyon who signed the order sending Jewish children to their deaths at Auschwitz? This senior citizen personally tortured men and women, was responsible for sending thousands of Jews and members of the French Resistance to concentration camps, and earned the sobriquet "Butcher of Lyon"?

It is because it does not seem possible that this trial is so important. France is placing itself ou trial and facing for the first time the truth that not only did the collaborators far outnumber the Resistance fighters, and not only did the collaborators fully accept the idea of the "final solution," but that within the ranks of the Resistance, there were traitors who sold out - their colleagues.

Since Barbie was extradited to France from Bolivia four years ago, his trial has been delayed numerous times, prompting charges that prominent Frenchmen in business and govern-

This excerpt from The New York Times Mag- ment are afraid of what may be revealed about theit collaborationist pasts.

But a key element in the Barbie case trial - is the American involvement with Barbie at the close of the war, itself the principal reason it has taken almost 44 years to bring the "Butcher of Lyon" to justice. For Barbie was recruited as an agent by the U.S. Army Counter Intelligence Corps in 1947, and worked for it until 1951, when Americans arranged his escape to Bolivia

Barbie's 1947 recruitment by the corps was first formally disclosed in 1983, in a Department of Justice report by Allan A. Ryan Jr. entitled "Klaus Barbie and the United States Government,"

What did not come out in that report, though their names were included, were the personal recollections of the young soldiers who had been Barbie's "handlers." Robert S. Taylor, who had been part of a

Counter Intelligence Corps team searching for Gestapo records in county seats and was work-ing as operations officer in Memmingen, near Munich, was to be the first of Barbie's American handlers. The 68-year-old former dean of information studies at Syracuse University in New York recalls the day in March 1946 that events were set in motion.

A man named Kurt Merk, who had been a licatenant in the Abwehr, the German military intelligence, came to his office to volunteer his services. Native intelligence talent was in short supply, and Merk was an avowed anti-Communist who, later on, often told Taylor that the Americans and the Germans should have teamed up and finished off the Russians. On April 10, 1947, Merk told Taylor that he

had met an old friend from wartime service in lieves that be and his beliefs were betrayed by France, a man named Klaus Barbie who was available for intelligence assignments. Taylor recognized the name, which was on two Allied lists of wanted war criminals, as a target of a recent "swoop" operation against an SS underground group; Barhie was the only former SS

officer who had escaped arrest. On April 14, Taylor informed the commander of his CIC region in Munich, Lientenant Colonel Dale Garvey, of Barbie's availability, and they agreed that he would be a valuable asset, in spite of his "wanted" status. On April 18, Taylor met Barbie at Merk's apartment in Memmingen.

Taylor recalls that he was left with a favorable impression of Barbie, who presented a sanitized version of himself, omitting mention of his actions in Lyon. On May 27, Taylor sent the following report to CIC beadquarters in Frankfurt: "Barbie impressed this agent as an honest man, both intellectually and personally, absolutely without nerves or fear. He is strongly anti-Communist and a Nazi idealist who be-

the Nazis in power."

Major Earl S. Browning Jr., who was opera-tions officer for the CIC headquarters in Germany, located in Frankfurt, recalls the shock he felt at learning that Barbie had been recruited as an agent.

Sitting in the book-lined basement recreation room of his home in Fairfax, Virginia, Brown-ing, now 69, recalled the day in October 1947 that his assistant, James H. Ratliff, had burst into his office and said: "Garvey's doublecrossed us. After having us chase after Barbie, he is sitting in Munich using him as an agent." On Oct. 29, Browning directed the Munich

region of the CIC to arrest Barbie and send him to the European Command Intelligence Center at Oberursel, near Frankfurt, for "detailed interrogation."

The Munich region complied with Browning's orders in mid-December. Barbie was arrested and questioned unril the following May. Elusive as ever. Barbie sidestepped all damaging admissions, telling only what was already

Barbie returned to his intelligence activities in Memmingen. In June, he found he had been assigned to a new handler, Erhard Dabringhaus, a German-born American soldier. Barhie benefited from the fact that his CIC handlers kept changing while he remained in place, so that, in some cases, he came to know more about the CIC's espionage operations than they did.

Sitting by the side of his pool in Sarasota, Florida, Dabringhaus, a 70-year-old retired college professor, remembered that Barbie kept pressing him for American dollars to cover travel expenses. As time went on, the situation between Barbie and Merk seemed to deteriorate over the allotment of funds; Barbie was getting cash, while Merk was being paid in cigarettes and coffee. "If the Americans found out what Barbie did in France," Dabringhaus remembers Merk telling him, "the atrocities he committed --- not even your General Eisenhower could protect him." "What was he doing?" Dabringhaus asked.

"He was the bead of an Einsatzkommando with 120 men," Merk said. "I once visited him in Montluc prison in Lyon, and in the basement be had some French Resistance fighters hanging by their thumbs, day after day, until they died

Dabringhaus reported what Merk had told him to his superiors in Munich. No trace of his report bas survived, hut he says he was told: "Don't get excited. We'll turn him over when he's no longer useful."

In October, Dabringhaus was reassigned after serving as handler for only four months. In Frankfurt, Major Browning, the operations officer, was still urging the Munich region to drop both Barbie and Merk. In April 1949, after three years as an agent. Merk was dropped, but Barbie was allowed to stay on, focusing on Communist Party activities.

Barbie's handler now was Eugene Kolb, who had interrogated German prisoners of war as a CIC officer during the Battle of the Bulge. Kolb found Barbie shrewd and competent; he spoke freely of his work in Lyon against the Resis-tance, but he impressed Kolb as being "clean." In May, a clipping from a Paris newspaper, with the headline "Arrest Barbie Our Torturer." was brought to Major Browning's attention. "During the occupation," the article said, "be hurned his victims with an acetylene torch to make them confess during interrogations which lasted more than 48 hours." Major Browning showed the clipping to his command-ing officer, Colonel David Erskine, who dismissed it.

Kolb, like Colonel Erskine, did not give the article much weight. The sources were former Resistance fighters, most of them leftist if not outright Communists, and from what he knew of Barbie, the use of a blowtorch was not in character.

Major Browning, however, ordered Kolb to interrogate Barbie about the article, which Kolb did. Kolh reported on July 20, 1949, that Barbie had been "discreetly interrogated with negative results."

Although Kolh's report silenced Major Browning, after the publication of the Paris article, Barbie was dropped from CIC records and accuser.

At length, the CIC decided to use a "rat line" developed by its unit in Austria to spirit compromised agents and defectors from the East bloc to South America, via Italy.

On Feb. 21, the Combined Travel Board issued to one Klaus Altmann a temporary travel document "in lieu of passport for stateless persons," valid for travel to Austria and Italy. The Italian Consulate in Municb gave him a transit visa for travel through Italy. On March 9, two CIC agents accompanied Barbie, his wife, Regina, their 9-year-old daughter, Ute, and 4-year-old son, Klaus-Georg, by train from Augsburg 10 Genoa, arriving March 12.

Barbie and his family boarded the Italian vessel Corrientes, bound for Buenos Aires on March 23, joining what Marcel Ophuls has called "the diaspora of the torturers." Then Barbie and his family took a train to La Paz, Bolivia. He remained in South America for 32 years.

In France the generation that had known the war did not forget Barbie, and when it became known in 1983 that be bad finally been extradited, thanks to the cooperation of the first civilian government in Bolivia in many years, and would stand trial on the very ground where the blood of his victims bad been spilled, there was rejoicing. But there was also an uneasy feeling, which helps to explain why it has taken four years to bring him to trial.

The uneasiness in the Barbie case stems from the likelihood that the trial will tear France apart. Barbie, according to his lawyer, Jacques Vergès, will not go down alone, hut will turn his trial into the trial of all France. The extent of French involvement in Nazi crimes is known. In fact, 90 percent of the more than 76,000 Jews deported during the German occupation were arrested by the French police, not the Germans. When the trial begins, the circle will close, with Barbie standing in the dock as both accused

Shifting Gears in a Volatile U.S. Bond Market

FOCUS **Fund Turnover: How Important?** OW CLOSELY SHOULD prospective mutu-al fund investors scrutinize portfolio, timpover

rates? Is there a correlation between a manager's trading activity and fund performance? Such ques-tions have long been debated by investors, but have become particularly relevant with the increasing num-ber of aggressive funds that turn over essets at a dizzying pace.

. . . .

1 14-11

Like individual investors, fund managers must weigh the potential returns on new investments with the costs of trading. These costs include not only brokerage commissions but also the difference be-tween bid and offered prices for stocks, called the spread. In the quest for gains, the job of the manageris-to make sure profits are not consumed by trading costs.

One measure of trading activity is the turnover rate, which can be found in fund prospectness. To calculate the rate, the fund determines the total value of pur-chases and of sales for the year. Then it takes the lower of those two figures and divides it by the fund's average annual asset value.

Stock funds in the United States have an aven turnover rate of about 30 percent, according to Gerald Perritt, editor of The Mutual Fund Letter. A typical fund holds a stock an average of 15 months, he says. According to Mr. Perritt, mutual funds with higher turnover rates generally have not been able to offset their increased transaction costs with better performance. In a recent study, Mr. Perritt divided 40 mutual mance. In a recent study, Mr. Pertit divided 40 matural funds into two groups: one with an average turnover of about twice a year, and another with turnover of about once every five years. The study showed that the mutual funds with the lower average turnover outper-formed, those with higher turnover by 15 percent in 1985 and 5 percent in 1986.

"The difference in performance between high and low performance funds can be traced back to trading costs," Mr. Perritt says. "The more you trade, it takes all the running you can do to stay in the same place."

THERS QUESTION his findings. "The stud-ies have indicated a relationship between higher turnover rates and lower performance," says Robert Levy, president of CDA Investment Technol-ogies Inc. in Silver Spring, Maryland, "But the difference in performance is so small that it could have been the result of statistical error."

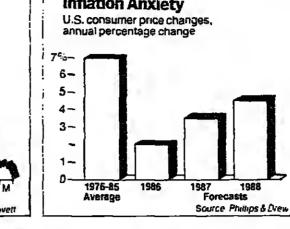

Yet, Mr. Levy acknowledges that his own studies have generated similar results. Mr. Levy's research shows that bank trust departments, which had an average turnover rate of 33 percent, or once every three years, have consistently outperformed mutual fund managers, whose mmover rates averaged 62 percent her year last year ...

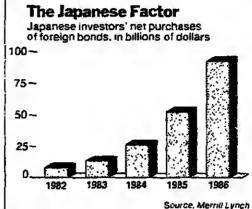

Surprisingly, total transaction costs for fund managers average 4 percent, about the same as they are for individual investors, according to Mr. Peritt. While

individual investors, according to Mr. Perint. Winte inokerage commissions are a smaller component, he notes, the costs associated with the spread between bid and ask prices are greater with higher volume. On that basis, a fund manager who turns over assets twice a year would have to earn a return of 20 percent to keep pace with the Standard & Poor's 500 Stock Index 60-year annual average of 12 percent, Mr. Perint potes. Only mine mutual funds have averaged better notes. Only nine mutual funds have averaged better than that in recent years, he adds. "This bodes heavily against turning over portfolios very frequently." The average mutual fund unnover rate is on the tise,

THE FEARS The precipitous decline in the dollar raises fears that U.S. inflation could surge, especially if the economy builds up momentum. Some commodities prices are already showing sharp rises. Another worry is that Japanese institutions would shun U.S. Treasury debt because yields are not high enough to offset the currency risk.

employees confer outside the Federal Reserve building in lower Manhattan before putting in a bld for 30-year U.S. Treasury

After the bloodbath in April, higher coupons are luring buyers who see a a slack economy.

By William McBride

New York

AN MACKINNON HAS A WORD for it: "monomania." That is how the senior vice president at Vanguard Group, a fund management firm in Valley Forge, Pennsylvania, describes the bond market's tendency to be obsessed with a single figure that seems to sum up its anxieties. In the past, there was the money supply, then the price of oil. Lately, the affliction has been dollar "monomania."

It was the dollar's wrenching dive to a postwar low against the yen that ignited panic among bond inves-

against the yen that ignited panic among bond inves-tors in late March. From then through the first of May, the value of long-term bonds shrank 12 percent as yields soared from 7.5 percent to 8.75 percent. Even more unnerving was the volatility of the slide. During April, the average daily price change of long-term bonds was \$10 for every \$1,000 face amount. That seemed to erase definitively any quaint notion of bonds as conservative investments. bonds as conservative investments.

"I can't remember a time when market psychology has been more unstable," says David Jones, chief economist at Aubrey G. Lanston in New York, a dealer in government bonds. Last week, the market was able to end on a hopeful

note after a series of auctions of U.S. Treasury debt found adequate demand at the higher interest rates. But the question for investors in the new issues was whether the higher coupons sufficiently compensate them for the risk that interest rates could be forced even higher. The answer from many money managers and econo-

mists is yes, and then some. In fact, they believe the fixation on the dollar has caused investors to ignore the weakness in the world economy that may result in a

return to lower interest rates later in the year. "I think the market is overreacting," says Art Mi-cheletti, director of U.S. research for Bailard, Biehl & Kaiser, a San Mateo, California, money management firm. Slow economic growth could bring long-term U.S. interest rates back down to about 7 percent by the end of the year, he says,

While other analysts are less certain that long-term. **Continued On Page 8**

Steady. Our worldwide leadership in research puts you

reflecting profit-taking and efforts by managers to keep up with the more rapidly rotating leadership among sectors of the stock market, Mr. Pertitt says. "That generally happens in an ongoing bull masket," he says. "In a bear market, it tends to go down."

NDEED, A NEW CROP of small, aggressive funds have spronted in the last few months. T. Rowe Price's Capital Appreciation Fund, which has a turnover rate of 130 percent, tries to "take

has a turnover rate of 130 percent, thes to "lake advantage of short-term profits, particularly when the market is valuerable on the downside," says Richard Fontaine, the fund's president and manager. "The turnover should be intelevant," Mr. Fontaine argues. High turnover is justified by an increase in performance, he says, noting that his \$77 million fund carned a total return of 19.7 percent in its first ten months. "The bottom line is how much money you made."

made." By comparison, The Acom Fund, a Chicago-based mutual fund that invests about \$500 million in small capitalization stocks, has a turnover rate of only 34 percent. Trading in these relatively illiquid stocks "can be archuous and expensive," says Ralph Wanger, the fund:

fund's manager. "We don't try to catch every ripple in the ocean," explains Mr. Wanger, who finds turnover rates very descriptive of a fund's philosophy. "The majority of successful investors have generally done well by sit-ting with their funds for incredibly long periods of time."

BOURSES

The volume is evidence of the rally's breadth.

By John Meehan

New York RADERS WERE AN-NOYED, exchange offi-cials flustered. But for eager goldbugs, the overwheiming volume that swamped the New York Commodity Exchange and forced it to shorten its dealing hours last week to resolve leftover trades was just another symptom of the growing interest in precious met-

The Comex's problems began April 27 when ailver prices suddenly fell 40 percent to \$7,20 an ounce. The resulting hectic trading quickly over-burdened the market's computers. At the end of the day 50,000 trades were unmatched.

Emerging Growth Stocks, French Style

ounce and briefly traded above \$475 on the Comex a couple of weeks ago. It has since fallen back and recov-ered, hovering around \$455. Similar-ly, silver, which has led the way in the current rally, has climbed back to around \$8.00 after a sharp correc-The retrenchment, analysis say, was actually a healthy sign. Gold prices have been rising slowly, but steadily, since February 1985 when they stood at \$281.20. Each major step, however, has been matched by a subsequent drop in price that left

"The Comex just isn't used to this

kind of activity," says Bette Rapto-

poulos, precions metals analyst with Prudential-Bache Securities. Indeed, in the five trading days preceding April 27, daily volume averaged 183,000 futures contracts, more than

anead of the game.

N THE FACE OF IT, things could not be the CAC index of French stocks has more than quadrupled. Last year alone, it soared by 50 percent and it has advanced another 15 percent so far in 1987. better for the Bourse. Over the past four years,

Paris

But a growing number of money managers are inclined nowadays to talk about the dearth of affordable growth stocks in Paris. It is a complaint that is hardly unique to the Bourse. Decent value is hard to come by anywhere thanks to the prolonged equity rallies. Yet it does mean that investors in Paris will have a tougher time.

By Jacques Neher

"The market has become fully priced," says Hugh Priestley, a director with Henderson Administration PLC, a London-based fund manager. "You have to be a bit careful committing more money to it. You have to take more of a six-month view."

Indeed, finding a bargain in Paris has become quite a challenge. Brokers and research analysts have tended to limit their search to a handful of sectors, spending much of their time combing through the second marché, which is populated with smaller, emerging companies. Financial services is one sector that has received a lot of

attention. Analysts are especially keen on companies posi-tioned to profit from the planned reforms on the Bourse.

gold prices slightly higher than they were before. This was the case in October when prices rose to \$460 an

The rally was initially led by platinum, which soared to \$675 an ounce on belief that South Africa would cut off precious metal supplies to the United States in retaliation for trade sanctions. Prices settled back when it became apparent this would oot occur. "It's certainly not going to be a repeat of the late 1970s." says Michael Oliver, a gold analysi with James Capel & Co. in London. "Prices won't take off into the stratosphere. But we're still in a bull trend." Although talk about the stability of South Africa arises often in the gold market. it is generally seen as a micor factor io the current price increase.

Instead, analysis attribute the latest flurry of activity in the precious metals market to concern about the weakening dollar and its inflationary implications for the United States. These same worries have already unsettled U.S. stock and bond markets, accelerating investor interest in gold as a bedge. Two weeks ago, for example, Shearson Lehman

Brothers suggested to clients that they allocate 5 percent of their portfolios to gold bullion. Some portfolio strategists have suggested an even bigger commitment.

The diversification, gold specialists say, could help offset the 100 metric tons (110 short tons) of surplus productioo that has plagued the market in recent years. "As more people get interested, more and more gold is getting taken off the market," says Gail Levey, who tracks precious metals for Shearson Lehman. To be sure, oot all investment strategists agree that the fundamentals are in place for a sustained rally. Hard evideoce that inflatioo is coming back strong is

sparse, some argue. After increasing 1.1 percent in the United States

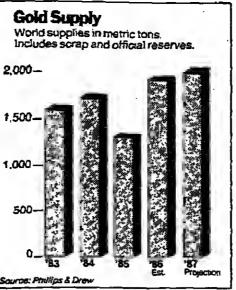

last year, some experts think prices will rise between 3.5 percent and 4 percent this year — significantly lower than the double-digit rate that ignited the rally in the late 1970s and helped carry prices over \$800 in 1980

Yet, many analysts say that double-digit inflation is oo longer a occessary ingredient. A modest inerease, they argue, will be enough to sustain the market. "The perception is that inflation will rise." Ms. Raptopoulos says. "That's the biggest factor."

No one rules out a steeper correction. Ms. Levey sees the lower support level at around \$440. Martin Armstrong, a technical analyst and chairman of Princeton Economic Consultants in Princeton, New Jersey, sees the possibility of gold dropping to \$430, or to \$408 in a worst-case scenario.

Yet, most analysts do not view this as a cause for concern. Over the next couple of months, experts expect gold prices to continue to move inversely to the dollar. Only a strengthening of the dollar, they say, will derail the rally.

As loog as the current uncertainties prevail, they believe, more investors will turn to gold. Already, dealers talk confidently of \$500 an ounce, although timing forecasts differ.

Jack Schwager, a technical analyst with Paine Webber Inc., believes prices will gradually recover in the coming weeks. If they top the highs reached a couple of weeks ago, he says gold could quickly climh to \$500 hy the summer. "If think we're oowhere near the end of this rally." he says. "But it is important to see how fast it gets to those highs."

Jack Joes, a gold analyst with Phillips & Drew in London, says prices will likely consolidate around current levels in the oear term, but sees \$500 toward the end of the year.

N MANY WAYS THE DOLLAR remains a key. Mr. Armstrong ootes that gold has fallen in price in terms of other currencies, notably the yen and Deutsche mark. Uotil there is significant huying from investors in Europe and Asia, he says it will be difficult to sustain a rally.

"This is the first stage," he says. "The real bull market has oot yet begun."

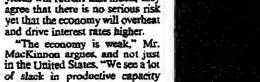

Mr. Armstrong expects the current stage - in which the increase in prices merely offsets a declining dollar - to continue in the near term. The dollar, be reckons, will drop another 15 percent in value through the summer.

By September or October, bowever, be believes the dollar will stabilize. At that point, gold will have dropped to its lowest point in terms of nondollar currencies and begin to attract substantial investment from outside the United States. "We won't get above \$500 until the dollar stabilizes," he caotions.

If gold makes it above the \$500 level and shows some staying power, most analysts predict a sustained rally marked by rapid price movements. Mr. Armstroog is already talking about \$1,000 an ounce by 1989 given the fact that more investors are willing dabble in gold than ever before.

Many analysts agree that prices will move quickly, in large part because of a greater acceptance among American investors of gold as a legitimate invest-ment. One indication of this is the heavy volume of gold coin sales in the United States. Since it was introduced hy the U.S. Treasury last October, the public has purchased over 2 millioo ounces of American Eagle coins.

"Once it goes." says Prudential-Bache's Ms. Raptopoulos. "it will go quickly."

demand for credit is coming from." Indeed, even a sharp drop in U.S. unemployment reported on Friday failed to dent the market's post-auction confidence. To some extent, that appeared to be because the 0.3 percentage-point drop in the johless rate in April, to 6.3 percent, was seen as a tentative sign of more vigorous economic growth and thus also huoyed the dollar.

worldwide. We wonder where the

But another reason is that the recent rise in interest rates will itself act to restrain the economy. notes Robert Chandross, chief economist for Lloyds Bank operations in New York. "It's going to have particularly negative effects on the housing sector, he says. He believes that long term interest rates are near their high point for

Merrill Lynch, the U.S. investment firm, estimates that the ecoo-omy will grow at an annual rate of only 2 percent for the rest of the year. With the export sectors of Japanese and West German in-dustry burdened with strong currencies, those two economies may bot manage to match U.S. growth, according to estimates by Phillips & Drew, the British brokerage firm.

ACKERS OF BONDS sav b that with slack econom growth, the Federal Reserve will be reluctant to tighten credit much beyond than the "nudge" upward in short-term rates that Chairman Paul A. Volcker recently acknowledged in Congressional testimony. Nor will the Fed need to do so to attract foreign investment in U.S. Treasury debt, these analysts reason.

The differential between longterm dollar and yen interest rates is nearly 5.5 percentage points. helping allay fears that Japanese investors will desert the American bood market. While Japanese demand was not overwhelmingly strong in last week's auction, say market observers, it was sufficient to caim fears of a pullout.

From the viewpoint of a Japanese investor, "we calculated that the dollar could depreciate anoth-er 70 percent," and U.S. bonds would still be attractive compared with yen boods, says Mr. MacKinnon of Vanguard. Meanwhile, there are reports that Japan and West Germany will move as soon as this week to bring official interest rates still lower, which would

Why Bears Are Stalking **U.S. Brokers**

By Alex Barnum

New York HEN AMERICAN EXPRESS Co. announced plans to offer shares in its Shearson, Lehman Brothers subsidiary to the public, the broad-based financial services company had hoped that its strategy would boost its own share price as well as raise more than \$600 million in new capital. In the end, both goals proved emsive. Of the 18 million shares in Shearson that were initially

offered on Thursday, investors purchased only 4.7 million. And even though the shares came to market at \$34 a piece, the lower end of the range expected by most analysts, the stock ended its first day of trading unchanged. By contrast, shares in American Express dropped more than 1 point as the market got wind of the disappointing results.

"The offering really looked terrible," an observer says. "This has exacerbated the industry's situation."

The exphoria that has swept the stock market to new records has side-stepped shares in the market's brokerage houses. In the past year, the Standard & Poor's 500-stock index has risen more than 20 percent. By contrast, the share price of Salomon Brothers Inc., the industry's leading underwriter, has plunged 32 percent, and First Boston Corp., another leading investment banking firm, has skidded 13 percent

"These stocks have gotten creamed," admits Rodney Schwartz, a financial services analyst at PaineWebber Inc. Problems at Merrill Lynch, which announced two weeks ago that it had losses of more than \$250 million in the second quarter because of unauthorized trading, have only added to investors' concerns about the sector.

Brokerage stocks are drastically undervalued compared with the rest of the market. Price earnings ratios are low at an average 10 times 1986 earnings, versus 18 for the market as a whole. And stocks are selling for less than two times book value --- cheap relative to the three times book value paid last year in private acquisitions of Kidder Peabody and Dillon Read, notes Samuel Liss, a Salomon Brothers analyst.

But the likelihood of any improvement in the near term seems remote. Profits this year are expected to remain flat, providing investors with little incentive to begin biliding up prices, analysts say. "On an earnings basis, forget them," urges Perrin Long, who follows the industry for Lipper Analytical Securities Corp.

A major reason investors have been avoiding the brokerage stocks, analysts say, is concern over the insider trading scandal and the prospect of government fines and major investor lawsnits.

Adding to the uncertainty is a general nervousness about the stock market, Mr. Long notes that the large brokerages that cater to institutional clients would be faced with a collapse in underwriting profits if the markets were to turn bearish.

Similarly, the retail-oriented firms would see trading profits begin to evaporate. Indeed, Mr. Schwartz adds some investors are beginning to short these stocks, putting more downward pressure on the group.

Costs are another factor. Major brokerages continue to spend heavily in large part because of efforts to keep pace with an expanding global business. All major firms have expanded activities in London. In

Japan, Goldman Sachs, Merrill Lynch and Morgan Stanley Japan, Goldman Sachs, Mernil Lynch and Morgan Stanley have been awarded limited trading powers on the Tokyo Stock Exchange, Salomon Brothers, which recently sunk and the Morgan Stanley \$8.55 \$7.65 \$300 million in capital into its Japan operations, appets to win a seat on the exchange next year.

A commuter checks a stock price at the Merrill Lynch office at Grand Central Station in Manhattan.

Because of "the tremendous potential in the internation-al area," the large institutional firms look good in the long term, says Richard Samartino, an analyst at Argus Research Corp. In the short term, however, the price of such expansion has been staggering. The most dramatic example is Salomon Brothers. The

brokerage's net earnings dropped 7 percent to \$516 million in 1986 as its 40 percent increase in staff sent costs soaring. "The economics of the move were not optimal," admits

John H. Gutfreund, Salomon's chief executive officer. But he notes that costs have begun to level off and trading has increased enough to raise profits to \$149 million in the first quarter. "It takes some time for the revenue stream to velop," he says.

First Boston, which ranks a close second in underwrit-

Earnings Outlook

Firm	1988	1987	1986 Actual
Salomon Brothers	\$4.39	\$3.81	\$3.45
First Boston	\$5.67	\$5.46	\$5.10
Merrill Lynch	\$4.03	\$3.53	\$3.31
Paine Webber	\$3.75	\$3.08	\$3.03
E.F.Hulton	\$2.75	\$2.62	\$-2.90
American Express	\$6.29	\$5.57	\$4.53

ing, expanded operations last year by about 35 percent. But earnings are more stable, says Mr. Liss, because the companv's traditional forte of advising on mergers and acquisitions continues to bring in substantial revenue from last year's takeover wave. He recommends the stock for the long haul.

say. Merrill Lynch, PaineWebber and E.F. Hutton still earn a substantial portion of revenues from the individual investors. Having largely avoided the problems associated with the large institutional brokerages, these firms general-

Though still undervalued, their share prices have been sustained by the dramatic increases in trading activity since the start of the year, the experts say. Tom Brown, an analyst at Smith Barney, Harris Upham & Co., says PaineWebber is most likely to henefit from the increase. One ootable exception in the group is Merrill Lynch, which suffered an extraordinary loss of \$250 million in its

interest rates picked up and the value of its holding plummeted. The loss, much of which was incurred by one trader, prompted analysts to decrease annual earnings estimates on Merrill Lynch by as much as 15 percent.

Experts were divided on the outcome of the Shearson offering long before its public debut last week. American Express hoped to raise \$612 million from the sale. In addition, Nippon Life Insurance Co. had agreed to buy 13 million newly created shares for about \$540 million. The net result was to have raised Shearson's total capital above \$3 billion.

When all these transactions are complete, American Express will still retain a majority stake in Shearson and the company has agreed to maintain at least a 40 percent interest until 1990. At the same time, Nippon Life has agreed not to increase its stake beyond 33,33 percent for the oext 25 years.

Shearson recently merited a price-earnings ratio of 13 from Mr. Schwartz because of good halance between retail and institutional clients. But Mr. Liss says "the appetite is not there" for an initial public offering.

Of universal appeal among retail-oriented firms are a number of smaller, regional brokerages. A.G. Edwards Inc., a St. Louis-based brokerage with a base of loyal individual clients, is widely recommended by analysts for its earnings consistency and ability to control costs. Anoth-er stock Mr. Liss likes is Legg Mason Inc., based in Baltimore.

Tokyo's Tiny OTC: Beset by Doubts

By Andrew Horvat

Tokro APAN'S TTNY over-the-counter stock market bas begun to show signs of life. But it is doubtful whether current investor interest alone will help the market overcome its prob-

Many investors - especially foreign buyers - are still hurting from major losses after a governmentinspired reorganization of the OTC four years ago. The goal was to encourage Japan's languishing venture capital market, but attempts to revitalize the OTC market ran aground as Japan's economic problems began to mount.

The big Japanese manufacturers, which decided against ploughing their earnings into new projects until prospects for economic growth improved, have scemed more interested in investing in well-established stocks. And the rise of the yen has drastically diminisbed the export markets that the small, high-technol-ogy companies envisioned to join the OTC were expected to exploit.

The failed attempt has only reinforced suspicions about the OTC. For many years many investors have viewed it as a dumping ground for stocks that bave been removed from the main exchange. A curious example is the Bank of Japan.

Originally, the central bank was on the prestigious first section of the Tokyo Stock Exchange. But because bureaucrats refused to raise the bank's capitalization, which stood at a meager 100 million yen, the stock exchange delisted the bank as it would any other underperforming company.

Foreign investors felt especially betrayed when the government's attempt to eliminate the OTC market's unpredictable, casino-like mentality did not work.

Nihon Dempaku, a maker of crystal oscillators. remains fresh in the minds of many investors. Share prices of this OTC stock seared from 380 yen in early 1983 to more than 5,000 yen in about a year. But shortly after issuing new shares - about 30 percent of which were placed overseas - the stock's value plummetted to the 1,000-yen level, where it has remained in spite of what one analyst has called "a roaring bull marker."

At present fewer than 200 stocks are traded on Japan's three OTC markets, compared with some 20,000 on the National Association of Securices Dealers Quotation System in the United States, which serves as a model for the Japanese.

For the past several years, the OTC's annual turnover has been less than the value of just one day's trading on the Tokyo Stock Exchange. Indeed, Tokyo's astonishing rally has focused almost exclusively on big blue chins.

HE PERFORMANCE GAP between the TSE's first section, where the blue-chip names

are found, and the second section, populated by smaller companies, provides a valuable monitor for OTC stocks, which generally are not big enough to qualify even for a second tier listing. In the past six months, first-section stocks have advanced just under 30 percent, while second-section stocks have actually declined 15 percent.

"The very few sad people in the market today are foreign fund managers of small-company stocks, says an analyst at a British brokerage in Tokyo.

It is not just the size of OTC stocks that has kept investors away. In contrast to the first section - where financial sector stocks are well represented - oearly 25 percent of the value of the second section is made up of manufacturing and electrical issues.

"The OTC market is worse in terms of dependence on electronics and machinery," says Masato Kawada, a director of GT Management's Japanese office. Still, despite its recent lackluster performance, Mr. Kawada says the OTC market offers some opportunities. The OTC, he says, can no longer be dismissed as the last step on the ladder for delisted issues.

Page 9

"OTC is a corridor for good companies on their way up and this might just be the right time to study the OTC market," he savs.

Indeed, much of the activity these days has shifted away from so-called "managed stocks," those that were delisted by the main market for poor performance, to new issues. Underscoring Mr. Kawada's claim that the OTC functions as a first step to the Tokyo Stock Exchange, in the past four years 16 companies have made the grade - most of them in 1986 and 1987.

About 30 new stocks are expected to be added to the OTC list this year compared with 22 in 1986 and 47

'The very few sad people in the market today are foreign fund managers of small-company stocks."

over the past three and a half years, according to the Japan Securities Dealers Association.

There are also signs that the Finance Ministry still intends to try to turn the OTC into a viable market for capital-bungry small companies. Last year, for the first time, the Finance Ministry permitted Japanese mutual funds to include OTC stocks in their portfolios.

Also last year Nomura Securities Co., Japan's larg-est brokerage, included OTC shares in a select smallcompanies fund that was listed on the Tokyo Stock Exchange, And, in a final indication of increased respectability for OTC shares, banks began last year to accept them as collateral.

For the moment, analysts are betting on serviceindustry OTC stocks to be the best performers in the years to come, Charles Elliott, an analyst at Goldman, Sachs in Tokyo, likes Recruit Cosmos, founded by university students many years ago to sell surveys on student attitudes to Japan's major employers.

Simon Smithson of Kleinwort Benson sees hope for Viva Homes, a chain of do-it-yourself hardware stores, as well as for Ten Allied, a group of pubs.

A recent new issue that has received a lot of publicity is Toa Domestic Airlines, a large company that survived in an atmosphere of heavy regulation but that now oceds funds to buy new planes, Placed on the market at 7,900 yen a share, for a price-earnings ratio of 140, the first trade took place at 30,000 yen,

The speculation in the shares bas drawn some harsh dgments, and analysts are advising clients to steer clear, Criocs suggested that TDA was hardly the sort of young company with a new product for which the

OTC was revamped four years ago. Mr. Smithson called TDA's OTC listing "one which epitomizes the excess of money these days." Another critic was more blunt, calling the offering "the ugly duckling of the year."

Emerging Growth Stocks, French Style

Continued From Page 7

The reforms are aimed at breaking the monopoly held by 61 French brokers and allowing greater fortign participation.

'The market has become fully priced. You have to be a

francs a share. In 1986, per-share earnings rose to 50 francs, and Mr. Ledeboer is projecting earnings of 75 to 80 francs a share this year. "I'd reckon they're going to see per annum earnings growth of 30

The outlook for retail firms is more favorable, analysis

are seen by analysts as better sbort-term investments.

relatively young morigage-backed securities business when

benefit from the freer environment is Dumenil Leble. The investment banking and mutual fund management concern, which trades on the second marche, "is unique in the French market," says Steven Schaefer, managing director of Oechsle International Advisers Ltd. in London.

"If you want to play the privati-zations in France and the opening up of the French stock market, this can be a very exciting stock," he says. The company, he adds, also is "very aggressive" in the bond market.

Mr. Schaefer expects Dumenil Lèble to report 1986 net carnings that are double or triple its 1985 profit of 47 million francs (about \$7.8 million at current exchange rates). And at around 2,700 francs a share, the stock is priced at only around 13 times earnings, consid-erably less than the French market average of around 19.

Companies involved in telecommunications are also getting a closer look.

"lo general, telecommunications can be an area in which France achieves a good relative position in the world," says Jérome Labin, an analyst with the Paris brokerage Jean-Pierre Pinatton. "Up to now, we have lacked market share, but with recent developments France could become an important fighter in this field." Mr. Labin believes SAT, a mak-

er of optic-fiber cables, computer modems and telecommunications multiplexers, is "well positioned" to take advantage of the cable television construction boom expect-ed in Europe in the years ahead. Only 2 percent of the homes in France now have cable, and only 5 percent of those in West Germa-

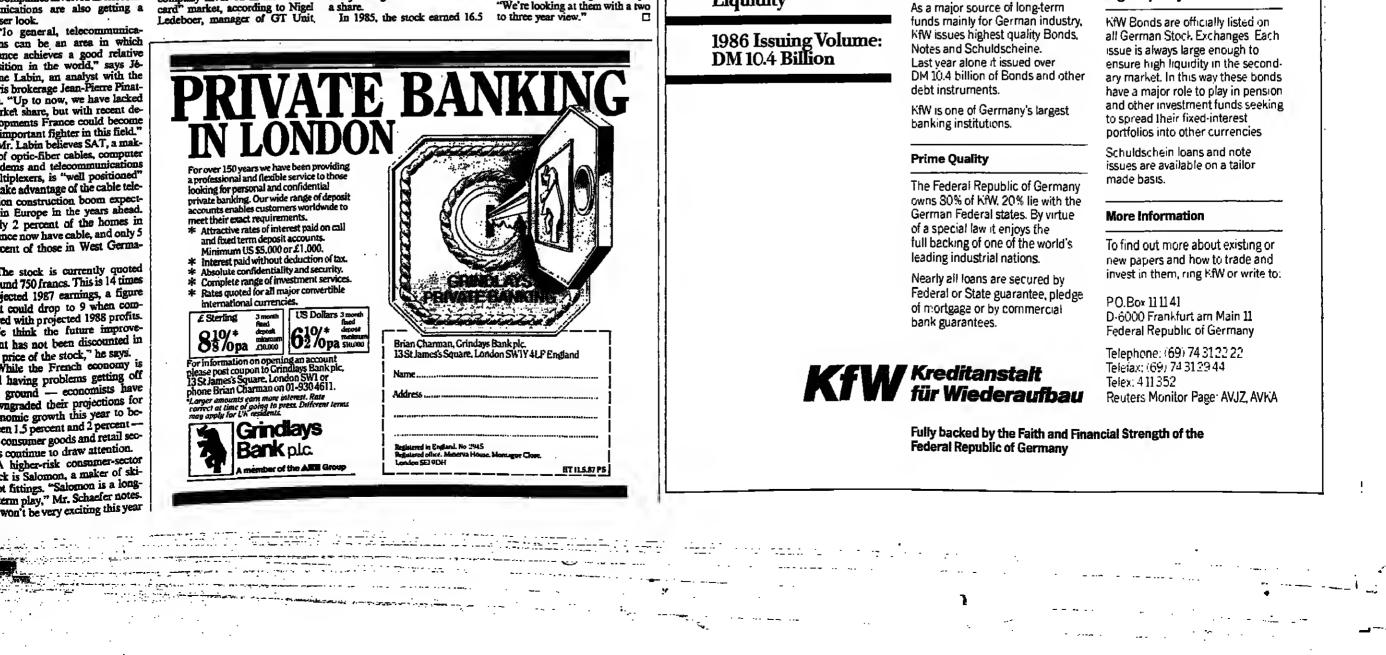

The stock is currently quoted around 750 francs. This is 14 times projected 1987 earnings, a figure that could drop to 9 when compared with projected 1988 profits. We think the future improvement has not been discounted in the price of the stock," he says. While the French economy is still having problems getting off the ground - economists have downgraded their projections for economic growth this year to be-tween 1.5 percent and 2 percent --the consumer goods and retail sectors continue to draw attention. A higher-risk consumer-sector stock is Salomon, a maker of skiboot fittings. "Salomon is a long-er-term play," Mr. Schaefer notes. "It won't be very exciting this year bit careful committing more money to it.'

or next, but it will explode after Manager's European Small Comthat." panies Fund. A smart card is a charge card or

The only reason to buy it now is that when it begins moving up, you won't be able to." Mr. Schaefer says. The stock is cur-rently priced at around 2,000 francs a share.

Investors looking for a small technology stock with big poten-tial might consider Ingenico, a company involved in the "smart card" market, according to Nigel Ledeboer, manager of GT Unit

to 40 percent over the next three to four years," he says. "It's a good little winner."

A "less sexy" French stock that ocvertheless has good growth potential, in Mr. Ledeboer's view, is Aussedat Rey, a paper company. Aussedat Rey, he says, is benefiting from a recent restructuring, lower oil prices and a strategic decision to move away from commodity products and build specialitics in niche markets such as

labels and voucher papers. These factors have paid off with improved margins. Though the company lost money in 1985, it earned 31 francs a share in 1986 T'S "ONE OF the companies we like best," Mr. Ledeboer and Mr. Ledeboer predicts it "should make something short of 50 francs this year and be in the mid- to high 60s in 1988."

says, "even though it's not a cheap stock." Ingenico, now selling on the second marché for The stock is still relatively cheap, selling for around 650 francs a share with a price-carnaround 2,700 francs a share, has a price-carnings multiple of around 35. The stock has more than quinings multiple around 13. "The tupled since it was listed less than great thing about them is a big two years ago at under 500 francs unprovement in margins," he says. "We're looking at them with a two to three year view."

Deutsche Mark Bonds

From Germany's Leading State-Owned Lending Institution

Prime Quality (AAA)

High Degree of Liquidity

1986 Issuing Volume: DM 10.4 Billion

Finding a secure investment for you and your clients is never easy. KfW would like to suggest you take a look at its Deutsche Mark Bonds and Notes as an investment of prime quality and high liquidity.

As a major source of long-term funds mainly for German industry. kfW issues highest quality Bonds, Notes and Schuldscheine. Last year alone it issued over DM 10.4 billion of Bonds and other debt instruments.

KfW is one of Germany's largest banking institutions.

Prime Quality

The Federal Republic of Germany owns 80% of KfW. 20% lie with the German Federal states. By virtue of a special law it enjoys the full backing of one of the world's leading industrial nations.

Nearly all loans are secured by Federal or State guarantee, pledge of mortgage or by commercial bank guarantees.

KfW Kreditanstalt für Wiederaufbau

Federal Republic of Germany

In Germany KfW Bonds are giltedged and eligible for investments by insurance companies, according to German laws.

High Liquidity

KfW Bonds are officially listed on all German Stock Exchanges Each issue is always large enough to ensure high liquidity in the secondary market. In this way these bonds have a major role to play in pension and other investment funds seeking to spread their fixed-interest portfolios into other currencies

Schuldschein loans and note issues are available on a tailor made basis.

Fully backed by the Faith and Financial Strength of the

Rethinking the Fortunes of Big U.S. Banks

Some analysts have begun to recommend selective buying.

BOURSES

By Vartanig G. Vartan

New York ONEY-CENTER BANK STOCKS done, and they have been recommending purchase of selected issue

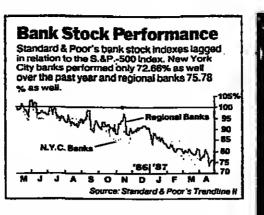

Lawrence W. Cohn of Merrill Lynch rates Citi-corp, Bankers Trust and J.P. Morgan as buys. "All three have better than average asset quality and long-term earnings growth prospects," be says. Thomas H. Hanley of Salomon Brothers recently reinstated buy opinions on the same three issues. He

also predicted that the money-ceoter group would outperform the general market over the next six to 12 months. If that forecast proves accurate, it would mean a

big improvement. So far in 1987, Standard & Poor's index of money-center stocks was up only 1.2 per-cent. compared with a gain of 17.5 percent for the S&P 500-stock index.

"J.P. Morgan is our one strong buy recommendation among money-center banks," says Thomas K. Brown of Smith Barney, Harris Upham & Co. "We also carry a buy on Bankers Trust." One problem of leading bank stocks is that, like insurance and electric-utility issues, their luster has

been dimmed by rising interest rates and revived

inflation fears. These sectors usually perform better in a disinflationary environment. But bank shares also suffered from Brazil's notice

in February that it would indefinitely suspend interest payments on about \$68 billion in intermediateand long-term debt to foreign commercial banks. This policy has already reduced first-quarter profits for American banks with outstanding loans to Brazil. Citicorp, for example, has reported that its net income for the opening quarter of 1987 was \$264 million, down 2 percent from \$270 million a year earlier. "Excluding the impact of the recent develop-ments in Brazil," the bank reported, "first-quarter income would have been S317 million, up 17 percent over the same period a year ago." Citicorp is the parent of Citibank, the largest American bank.

Analysts say that prospects for resolving the debt problem have taken a turn for the better with the naming of Luiz Carlos Bresser Pereira, an economist with broad business experience, as Brazil's new fioance minister

"This takes the negotiating process between Brazil and its creditor banks off dead center," explains

Luiz Carlos Bresser Pereira

James J. McDermott Jr., research director for Keefe, Bruyette & Woods, specialists in bank securities. "A recomment of the lost income for banks can come as early as the third quarter of 1987, but it should take

effect certainly by the fourth quarter." For 20 largest U.S. banks, an estimated \$15 billion in Brazilian loans has been placed on nonaccrual status, according to Mr. McDermott. For the first quarter of this year, he estimates, the collective cost to these institutions was to reduce their net income by more than \$225 million.

Merrill Lynch's Mr. Cohn also look an affirmative view of Brazil's new finance minister. The biggest view of Brazil's new infance minister. The tagest plus was getting rid of his predecessor, Dilson Fun-aro, who was the principal architect of Brazil's policy of confrontation with its bank creditors." "We are convinced," he adds, "that at some point in the second half of this year, Brazil will come to

Harke.

But De

terms with its creditors and pay up the past interest." Says Mr. Hanley of Salomon Brothers, "Il seems likely that the Brazilian keans will be placed back on a full accrual basis before the end of 1987, thus reversing any negative impact earlier in the year."

If bank negotiations with Brazil do not prove successful before the end of 1987, according to Mr. McDermott of Keefe, Bruyette, "the full-year earn-ings reduction for the 20 largest banks would likely approach \$900 million." Despite his optimism for an eventual compromise, he observes that "the road to a Rio restructuring is likely to he a difficult one, fraught with political and financial pressures."

When Salomon Brothers raised its investment opinion on money-center bank stocks in mid-April, Mr. Hanley noted that, on a price earnings basis, the shares were trading at a discount of nearly 60 percent to the overall market, or at "the lowest evaluation level of the postwar era." And the composite yield on bank issues was 4.2 percent, compared with about 3 percent for the S&P 500.

Not every analyst takes a positive view of money-center banks, even if the Brazilian debt situation is resolved this year. "We are not recommending shares of money-center banks," said William M. Weiani of

First Boston Corp., "although there may be some trading opportunities in these stocks." Instead, he prefers fast-growing regional banks in the Southeast. Mr. Weiant's top choice is Barnett Banks of Florida, which he described as "consistently instead and the stock and the stock of the stock increasing market share in the best bank growth market in the country." His second recommendation is Atlanta-based Critizens and Southern.

COLLECTING

The Vogue in Vintage Wristwatches

These elegant old timepieces are commanding stiff prices at auctions.

By Cynthia Catterson

Bond

Dan

and

1.1

.

. . .

Λ.

÷.

New York THERE'S AN OLD SWISS WATCH buried m the back of a dresser drawer, long forgotten since it was bequeathed by a relative, now is the time to dig it out. Vintage watches are being snapped up at high prices by a new breed of collectors who wear the elegant old timepieces with their daily wardroba

"Old wristwatches have become a highly visible status symbol," says Daryn Schnipper of Sotheby's watch department in New York.

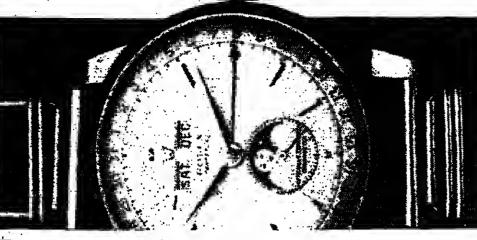

Mechanical wristwatches were all but forgotten by the public when the Japanese stormed the market with precision quartz watches in the 1970s. But rumors that Swiss makers of mechanical watches were about to close up shop prompted collectors to take a second

look at the intricate craftsmanship of these timepieces. The forecasts of the demise of the Swiss watchmakers proved false, but the fascination with wristwatches made from the 1920s through the 1950s has been gaining momentum over since. In a 1980 anction of timepieces, Sotheby's sold only six watches for a total of \$16,000. By last October, a sale of 251 lots became the first million-dollar wristwatch auction, followed by another million-dollar sale of 269 lots in February.

Ms. Schnipper says that a few years ago, only one or two absentee bidders would request reports on the condition of a wistwatch up for sale. In the last year,

continuon or a winstwatch up for sale. In the last year, she says, she has prepared more than 400 such reports. The increase in demand has sent prices soaring. Patek Philippe's gold perpetual-calendar, moon-phase chronograph model, made in the 1940s and '50s, which Sotheby's sold for \$8,525 in 1980, fetched \$44,000 in last June and \$66,000 in February. Sotheby's estimates that this model, which it considers a barometer of the overall market, will sell for at least \$45,000 to \$55,000 at its June auction through Ma. Schwinger thinks is at its June auction, though Ms. Schnipper thinks it

could get more. "Of all the watches people collect," she says, "this is the one they feel they must have." The highest price ever paid for a wristwatch was set

This 18-karat gold and ebony Rolex with perpetual moon-phase works was sold at Phillips for \$10,000.

at a Christie's anction last year in Geneva, when Patek Philippe paid \$165,000 to buy back one of its own. Richard Garnier, a watch specialist at Christie's in London, says the 1955 Patek perpenal-calendar splitsecond chronograph, one of only three timepieces the company made that year, might have sold for as little as one-tenth that price in 1980.

While demand for vintage Patek Philippes seems to be the greatest, watch specialists note that other famous names are escalating in price as well. "Makers like Ous names are escatating to prove a Audemars Piguet. and the early Rolex are synonymous with quality and therefore command the highest prices," notes Peter Besumont at Phillips auction house in New York. Prices for these brands have doubled and tripled in the last few years, he says.

To find bargains, Philip Whyte, a partner at

But buyers should beware. With the increased interest in vintage wristwatches has come an increased incidence of fraud, most often with Rolexes.

"Rolex made hundreds of thousands of watches and didn't keep detailed records," Mr. Whyte says. "Patek Philippe and some of the others would make maybe 10,000 of a single model, and each watch would have signatures, serial numbers or stamps that are easy to ieck.'

Mr. Whyte notes that watch cases are often counter-feited. He advises prospective collectors to inspect a watch carefully, inside and out. "It's casy to buy a Swiss watch and have Patek or Rolex painted on the

face," he says, "but you can't reproduce the intricate, polished movements of the finer, older watches."

Still. 2 signed movement is no guarantee. Cindy Fanelli, owner of Fanelii Anuque Timepieces Ltd. m New York, recalls a gold-cased Patek Philippe that she purchased for \$1.000, believing it to be worth at least twice that amount. But after checking the serial number with the watchmaker's records in Switzerland, she found that her model had been produced in stanless steed. The gold case was not original and her watch was worth only about \$650.

While make and authenticity are the most important factors, value also depends on the condition of the case and the movements inside. Value can be enhanced by such complexities as a chronograph, a split-second hand, a moon phase, a perpetual calendar (which automatically adjusts for leap years), and repeaters, which ring out the time in hours and minutes.

Original dials are extremely important. A watch with a refinished dial could be worth as much as 20 percent less than an original. "The dial is the personality of the watch." says Ms. Schnipper at Sotheby's. "Old watches should show their age

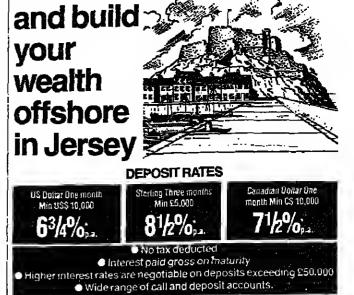

After the dial, details such as the shape of the case and its thickness come into play. Another oft-scruntinized detail is whether the face has Roman or Arabic numerals or merely slashes, known as batons.

As with all collectibles, there is no way to predict what turn the trend will take. Fashion can be fickle. Ms. Schnipper notes.

"For a long time, people wanted a 1950s Patek Philippe chronograph with round chronograph control buttons on the side," she recalls. "Then they decided that a model from the '40s with square buttons was more collecuble."

Sotheby's has estimated that one of the older models in its June auction will letch \$45,000 to \$50,000, "If it was the model with round buttons, it would be worth bout one-half as much," she says.

One thing seems certain, however. The market is driven by demand for men's watches. "It is the only jewelry that is really acceptable for men," reasons Mr. Garnier as Christie's.

The Ethical Side of Investing

British firms find a market for funds with a conscience.

FUNDS

By Jeff Ferry

HE GROWING TENDENCY of big institutional investors, banks and industrial companies to shim South African connections is again drawing attention to the ethical side of investing, Investment managers in Britain, like their American colleagues, have discovered the ap-peal of funds with a social conscience.

So far, there are three so-called ethical funds available in Britain, two of them formed last year. Industry sources expect two more to be

"We consider every idea that comes in from

One consequence of the approach, though, is a tilt away from the bigger companies. "It forces us down the route of smaller and smaller companies," he says. "It's hard, for example, to find a very large multinational without some link to South Africa."

As examples of investments favored by the Outside Britain, Mr. Franks cites The Limited, the U.S. women's clothing retailer; Izumi, a Japanese retailer, and Essilor, the French opti-

Mr. Bromige says the emphasis on small companies has paid off for the funds.

A watch in three colors of gold, made in Paris in the 1920s for an American financier, Otto Kahn.

our analysis, and try to shoot them down on ethical grounds," explains the fund manager, Tony Franks. "Most of them fail,"

fund, Mr. Franks cites Yorkshire Chemicals, a maker of specialty chemicals and dyes; R. Home, a paper merchant, and Baggeridge Brick. He says his fund has taken a "selective" interest in retailers, including Dixon's, the con-sumer-electronics chain. But it has rejected Sainsbury's, the big supermarket chain, be-cause of its large sales of alcoholic beverages.

cal products company.

There is a lot more mileage to he had right

launched soon by major institutions. The fascination with these funds has been broadened by evidence that performance need not suffer when portfolios are subjected to ethical considcrations

Britain's first and largest ethical unit trust, the Stewardship Trust, was started in June 1984 by the Friends Provident, an insurance company with Quaker origins. In Money Marketing magazine's most recent survey of the performances of 90 general unit trusts, the Stewardship came in 10th.

In the 12 months ended April 13, the Stew-ardship had a return of 25.5 percent, compared with an increase in the FT All-Share Index of 21.0 percent and the general trusts' average of 16.7 percent. Since the beginning of this year, Stewardship's assets under management have grown more than 20 percent, to £50 million (about \$82 million at current exchange rates). "It's not just that we all care about our

community," says the fund's general manager, Peter Silvester. "We believe that, if you start with good products which are useful to the community, and therefore have a good market, and if the company is well-managed, then that is a recipe for a profitable investment."

The Stewardship relies on a committee of its own board members and church and charity representatives to develop ethical criteria. An independent, nonprofit research group, the Ethical Investment Research Advisory Service, provides assessments of the companies. The Stewardship will not invest in companies active in South Africa or Namibia, in producers of armaments, alcohol, or tobacco, or in companies involved with gambling. But Mr. Silvester stresses that positive crite-

ria are equally important. The Stewardship seeks out companies whose products it deems useful to the community. Companies regarded as having good safety records, good employment records, and open and responsive man-

agements also warrant closer attention, he says.

The Ethical Investment Trust, managed by the insurance company D.J. Bromige & Partners Ltd., applies even more rigorous criteria. In addition to a ban on South African connections, arms, alcohol, and tobacco, it will not touch companies involved in nuclear power, product-testing on animals, or those making political donations of more than £10,000 a year. The fund also rules out companies that have been charged with violating Britain's Advertising Standards Code.

THE ETHICAL INVESTMENT Trust

will not invest in any company with more than 10 percent of its activities abroad. This is "not because we are insular," explains the managing director, David Bro-mige, "but because the research organizations are not quite there yet in Europe and the Far East for us to be sure of what we're investing in." The fund's evaluations of potential investments are also done by the Ethical Investment Research Service.

The Bromige fund has £1.4 million under management. "Domand is growing at a great rate, and we expect it to reach several million

very quickly." Mr. Bromige says. In the 15 months to April 30, value of the units rose 37 percent, compared with a 52.8 percent increase for the FT All-Share Index. "Our fund is 85 percent equity, so, in a lastrising equity market, it will be outpaced by the indices," Mr. Bromige says. The Fellowship Trust, managed by the Lon-

don brokerage firm of Buckmaster & Moore, is Britain's first ethical unit trust to take an international approach, with about 25 percent of its assets invested outside Britain. Using criteria broadly similar to those of Stewardship, it has grown to £2.3 million since its launch last July.

companies," he says. "You don't lose much by excluding many of the larger companies."

Correction

In the April 13 issue of Personal Investing, figures in the tables for the top 10 offshore funds in the 12-month and two-year periods ended March 31 were transposed. Here are the correct leaders and total returns:

For the 12 months, the leaders were Gart-more Oriental Ventures, 216.66 percent; Save & Prosper Gold Fund, 137.95 percent; MIM Gold & Precious Metals, 131.95 percent; GT ASEAN Hong Kong Growth, 122.98 percent; French Second Marche & Growth Fund, 115.41 percent; Thornton Australia, 115.01 percent; Australian & General Exempt, 112.62 percent; GAM Australia, 111.75 percent; Barclays Uni-Australian accumulation units, 110.29 percent, and Barclays Uni-Australian income units, 110.29 percent.

For two years, the leaders were the French Second Marché & Growth Fund, 302.70 percent; JF Pacific Income Trust, 259.71 percent; JF Pacific Securities Trust, 277.46 percent; Worldinvest Equity Fund, 260.44 percent; Quantum Fund, 256.84 percent; Lazard Bros. European Fund, 249.90 percent; Bamford Brandt Pacific Basin, 247.49 percent; Lazard Bros. Far Eastern Fund, 246.65 percent; Japan Portfolio, 243.04 percent, and Gartmore Capital Strategy Yen Convertible Fund, 239.54 percent.

Also, in the article on umbrella funds, the inital charge for the Guinness Mahon Global Strategy fund was incorrect, because of an editing error. The initial charge is 3.5 percent and is waived completely for direct investments over £50,000.

EUROBONDS Market Rallies on Auction, **But Dollar Doubts Linger**

By CARL CEWIRTZ

International Herald Tribune

ARIS — Financial markets ended on the upbeat last week. Exchange rates held in a more stable range than seen recently and the U.S. Treasury's \$29 billion spring refunding, which got off to a slow start, ended with a bang when the Japanese surprised everyone by buying close to 45 percent of the 30-year bonds put up for sale. The \$9.3 billion of long-dated bonds were expected to be the

most difficult part of the refunding and the anxiety over how badly the auction might go weighed heavily on the dollar bond

In the cuphona that followed, prices rose and the yield on the new bond fell to 8.59 percent from the offering level of 8.76 percent. However, some bro-

kers in Japan said that, taking into account pre-auction commitments to sell the bonds to non-Japanese investors, their net buying was less than 20 percent of the total. Even so, the price rise was a relief to the Japanese, who began lighten-

believe the dollar will not weaken, or interest rates rise,

Speculators now

had taken. They had gambled that they would find buyers for the paper for which they had very skimpy domestic demand.

But underneath the froth, the doubts remained - now focusing on the trade friction between the United States and Japan. Unless there is some significant shift in economic policy, international investors clearly doubt that exchange rates can be stabi-lized and the rise in U.S. rates halted.

How deep this doubt runs will probably be tested this week. Bankers expect the Eurobond market to try to re-open the fixed-coupon sector in dollars, which for the past two weeks has seen no new issues. The sole offering last week of a small, gold-imked issue for Hycroft Resources was really no test of the appetite for etrajout dollar date straight dollar debt.

. In fact, the popularity of gold-linked paper both in the bond market and in the stock market is taken by bankers as a measure of bow wary investors are. Banque Française du Commerce Exterieur offered 100 million European currency units with warrants to buy gold, for example, and shares in gold mining companies have been drawing demand.

EVERTHELESS, there is a strong feeling expressed by many bankers at the week's end that speculators are prepared to take a view that the rise in dollar interest rates has peaked and that the exchange rate will not weaken.

Evidence that speculators are returning to the market is suggested by the narrowing yield gap between Eurodollar bonds and the domestic issues. According to Credit Suisse First Boston, the yield on five-year Eurobonds narrowed to 30 basis points over Treasury yields last week from 39 basis points a week earlier. On 10-year paper, the yield gap fell sharply to 37 basis points from

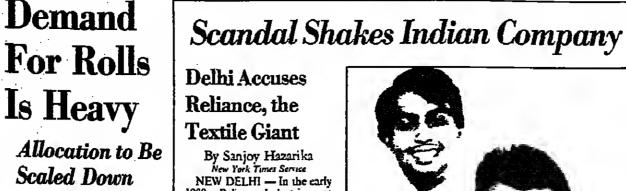

What action there was in the international capital market last week was confined to the sterling sector. Falling interest rates, a strengthening currency and, most likely, an imminent election that is expected to keep the Conservatives in power fueled a

that is expected to keep the Conservatives in power interest a powerful rally in bond prices. Early in the week, warrants to buy sterling bonds met a good response. Both J.P. Morgan and Brinish Land sold one-year warrants to buy fixed coupon bonds. Morgan's warrants, initially, offered at £13.5 to buy a 9 percent seven year bond ended fig. week at £17.5 — a gain of 30 percent. British Land's warrants, offered at £16 to buy 104 percent 15-year bonds, jumped 22 percent to £19.5

On Friday, Den Norske Creditbank sold two-year warrants at £17 to buy 94 percent 10-year bonds. At the same time, Britain's Prudential insurance company

At the same time, initian's Prodential insurance company tapped the market for a £150-million, 20-year issue carrying a coupon of 9% percent and priced at 100%. Deducting the 2 percent fees paid to underwriters, the Pru's cost of money was 70 basis points over the yield on British government bonds. Halifax Building Society offered £50 million of five-year paper the minimum metupicited by the Berk of England

------- the minimum maturity permitted by the Bank of England --but it arranged a three-year swap into floating-rate funds. It therefore set a fixed coupon for three years of 8% percent, which thereafter becomes a floating-rate note bearing interest of 17% basis points over the three-month interbank rate.

world.

1980s, Reliance Industries was

Allocation to Be Scaled Down

LONDON - The government's share issue of aero-engine company Rolis-Royce Ltd. was nearly four times oversubscribed, and the allocation will be drastically scaled

down, the trade and industry secretary, Paul Channon, said. There were more than two mil-lion applications, seeking 3.15 bil-lion shares, he said Saturday. Only

800 million shares were on offer. The shares, payable in two in-stallments, have been priced at £1.70 (\$2.85), valuing the company at £1.36 billio

The scale of the demand, with the current strength of the London stock market, should ensure that the shares open at a premium wbco trading begins on May 19.

"I was surprised by the level of the response," Mr. Channon said, adding that most applications were rom small investors.

"It is extremely encouraging that over two million people had confi-dence in the future of Rulls-Loyce Under a scaled-down allocation

system, applicants for 400 to 1,000 shares will receive 150; those for 1,500 to 2,000 will receive 200; 3,000 m 5,000 will get 250; 6,000 to 7,000 will get 300; 8,000 to 10,000 will get 250

will get 350. The issue is the latest in a series of denationalizations by the Conservative government.

Rolls-Royce aero-engines was rescued from collapse by a previous Conservative government in 1971. Since then it has returned to

up 48 percent from £81 million in 1985.

one of the fastest-growing indus-trial concerns in India, hailed as "the finest investment proposition ever seen by the Indian investor" in one magazine report. Today, the textile corporation is enmeshed in political and financial scandals - defending itself against, among other things, a government accusation that it smuggled in textile manufacturing equipment. The scandals bave rocked Prime Minister Rajiv Gandhi's government, Parliament and India's corporate As part of widespread market insecurity, also due to a sluggish economy, the stock prices of Re-liance and other prominent com-panies have dipped on India's

stock exchanges. Mr. Gandhi declared in Par-liament last month that "those responsible will not be allowed in go scot-free" if it were found that Reliance had violated banking rules. "Government will not protect or try to save any individual," he said, apparently referring to the Ambani family that

The story of Reliance offers an unusual glimpse into the com-plex relationship among Indian business executives, politicians and government sureaucrats and the intrigue, power and pressure that play a part in their relationships. It also mirrors the dramatic rise of Reliance's founder, Dhirubha H. Ambani, known for outflanking and alienating business rivals and winning powerful friends in government. "My business is my leisure,"

Mr. Ambani once said. "I enjoy it enormously."

U.S. Agriculture Department. On April 30, Agriculture Secre-tary Richard E. Lyng announced that the Soviet Union had agreed to buy up to 4 million tons of wheat program by making the bonus sales available whenever U.S. competiunder the Export Enhancement Program.

That program provides bonus amounts of U.S. commodines to sellers as a way to lower their prices.

This is the first big one. Hopefully, we'll have more," an Agricul-ture Department official said Fri-

day after the sale was announced. Under a nonbinding five-year agreement, the Soviet Union is supposed in buy at least 9 million tons of U.S. commodities, including 4 million tons of wheat.

The last major Soviet wheat pur-chase was 152,000 metric tons in October 1955, and the new sale is thus the first in the fourth year of the agreement and the first at subsidized rates.

The Soviet agreement to huy 4 million tons represents the largest sale ever of subsidized American wheat to a single country, accord-

ing to department officials. The Russians already have agreed to buy 2.64 million metric tons of U.S. corn in the current vear.

The Agriculture Department's Foreign Agricultural Service said

Foreign Issuers Reuters

KUWAIT -- Finland has betome the first foreign borrower in five years to raise money in the Kuwaiti bond market, with its 20 million dinar (\$74 million) issue also being the largest public offering in the once-popular market, the National Bank of Kuwait said Sunday.

The commercial bank arranged the seven-year issue with a 7.50 percent interest rate. Banking sources said the is-

sue ends a government moratorium on foreign borrowing in the market. It also provides additional lending outlets for iocal banks, limited by the recession caused by lower oil prices.

The first international, publicly quoted dinar bond issue was floated in 1974 for the Philppines, and between 1975 and 979 international borrowers raised 390 million dinars.

But by 1979, soaring interest rates on U.S. dollar securities had squeezed local liquidity and, amid fears of capital outflows, the government imposed a moratorium. A later relaxation lasted only until the unofficial stock exchange collapsed in 1982 with a \$90 hillion debi, again restricting liquidity.

Mohammed Ali Hafez, chairman Prime Minister Atef Sedki, who of Banque Misr, said in an inter-Saturday submitted a monetary re-form program to President Hosni would initially be floated at the Mubarak, met economic experts current free market rate of about for more than four hours to work 2.15 to the U.S. dollar.

out details of new rules governing The

These shifts have created huge trade surpluses and deficits, far outdistancing anything previously recorded.

Today, it's apparent that floating exchange rates are not the panacea politicians expected. The imbal-ances will not painlessly disappear. Market forces cannot be trusted to push exchange rates to whatever level may be needed to restore balance. In doing so, the world economy will be catapulted into a depression and financial (not to say political) crisis as the debt-laden developing countries give up any hope of ever servicing their massive foreign debt owed to commercial banks.

Taniguchi, Kristiansen Win London Race

LONDON (AP) — Hiromi Taniguchi of Japan won the London Marathon on Sunday in 2 hours 9 minutes 50 seconds, while Ingrid Kristiansen of Norway won the women's race hut failed to tower her world record and become the first woman

the women's race nut failed to lower ner world record and become inc first woman to break 2 hours 20 minutes for a marathon. Kristiansen, whose record of 2:21.6 was set in London two years ago, tired in the latter stages of the 26-mile 385-yard (42.195-kilometer) race after a blistering start and finished in 2:22.48. Two Britons were next, with Priscilla Welch timed in 2:26.51 and Veronique Marot in 2:30.15. Tanignchi, who won the Tokyo Marathon in February. finished 65 yards (60 maternahead of Nerhead al Maratho with Hunth form of Britain the

meters) ahead of Nechadi el Mostafa of Morocco, with Hugh Jones of Britain, the 1982 winner and runner-up last year, two seconds back in third place.

Couples Takes 2-Stroke Lead in U.S. Golf

(RVING, Texas (UPI) -- Fred Couples shot a six-under-par 64 Saturday and moved two shois ahead of Bob Lohr and Ben Crenshaw after three rounds of a Byron Nelson Classic being played in calm, sunny weather and on near-perfect greens

Lohr and Crenshaw, part of a four way tie for the lead after 56 holes, each shot 67 and were at 198. Greg Norman of Australia also shot 67 and was ued for fourth place at 199 with another of Friday's leaders, Donnie Hammond, Hammond shot 68 while Mark O'Meara, off a 64, was tied with Tom Byrum at 200. Byrum the other second-round leader, shot 69.

Friday's four-way tie was created when Lohr shot a course-record-tying 62, Hammond a 63 and Crenshaw and Byrum each 65. First-round coleaders Norman and Payne Stewart had dropped back. Norman with a 68 and Stewart with a 71. Stewart remained in contention Saturday with a 66 that put him at 201. Only one player in the of 74 failed to make a birdie, Dave Edwards getting 17 pars and a bogey.

By Steven Crist New York Times Service

NEW YORK - The best thing about Saturday's Preakness Stakes, other than the Maryland crab cakes, is that no one will be talking about the Dosage System.

Dosage, a theory of genetic analysis that claims to pick Kentucky Derby and Belmont Stakes winners hut admits it does not work for the Preakness, has become epidemic in the racing world at Triple Crown time, never more so than this year.

One local newspaper at the Derby a week ago Saturday neglected to list the jockeys and trainers in its entries for the race but listed each horse's "dosage profile." Television networks give the system extensive coverage, often treating its theories as fact, and some racing writers have proclaimed it foolproof. It seems that a majority of racing fans has been swayed into lieving that a horse cannot win the Derby or Belmont unless he fits on Dosage. Like most miraculous methods that claim to

pick high-priced winners while never losing, this one is seriously flawed.

The Dosage method, developed by a Shell Oil research chemist named Steven Roman, is a mathematical analysis of a horse's pedigree that is supposed to determine whether he has the genes to win classic races. The system begins by assigning points to each of the 15 sires in a horse's first four generations of ancestors. The points are then put into five categories, designed by Roman, known as "aptitudinal groups." Sires with a record of passing on early speed tall into the "brilliant" category at one end of the scale, and those who pass on plenty of stamina are classed as "professional" at the other.

The numbers are totaled in each category, then plugged into an algebraic equation. Finally, out of this sausage machine come two numbers, a Dosage Index and a Center of Distribution. With both figures, a lower number is supposed to show a better blend of speed and stamina and a proclivity for covering longer distances.

The cutoff numbers for the Derby and Belmont are a Dosage index of 4.00 and a center of distribution of 1.25. Horses whose numbers exceed those guidelines, say Dosage's most fer-

PEANUTS

HERE'S THE WORLD WAR I

FLYING ACE LOOKING

FOR HIS BROTHER ...

vent believers, are genetically incapable of winning the Derby or the Belmont.

On the face of it, the system has a strong record of success. From 1981 to 1986, six straight Derby favorites had unacceptable numbers and they all lost, and such long-priced vinners as Gato del Sol, Ferdinand and Alywhites as Gato del Sol, Ferdinand and Aly-sheba all qualified. For 57 straight years, say the disciples of Dosage, no horse has won the Derby without the right numbers. Within that claim lies the problem with the system. Since it was not published until 1982, the first 51 should not count in assessing its

Like most miraculous methods that claim to pick

high-priced winners

while never losing, this one

is seriously flawed.

access, since those results were factored into the design of the system. This is known as regression analysis - inventing a system to explain past occurrences. A system that claimed a perfect record by saying that no horse with 14 letters in his name has ever won the Derby in the mud looks great next to 113 years' worth of positive Derby results, but is worthless for future years.

Also, the system does not pick winners; it eliminates some contenders. This year, for exam-ple, 14 of the 17 Derby starters had acceptable dosage numbers. The world's worst horseplayer, given 14 chances in a field of 17, would have included Alysheba, and a child with a hatpin still had an 88.8 percent chance of being right. Dosage proponents also conveniently neglect

to mention the system's recent record in the Belmont Stakes. In the five Belmonts since the system was first published, it missed twice. Congistador Cielo in 1982 had unacceptable numbers; he won the race by 14% lengths. Three years later, Creme Fraiche was disqualified on Dosage but finished first. The Belmont, st a mile and a half (2,410 meters), should be an even sterner test of Dosage than the mile-and-aquarter Derby.

SPIKE IS IN

THE INFANTRY

Overdose of 'Dosage System' in U.S. Racing Equally troubling is the system's tatter lack of application to the Preakness. Roman says he makes no claim with the middle leg of the Triple Crown because its distance of a mile and three sixteenths is too short to qualify as a classic. That makes little sense. Almost every Derby winner has been in front after the first mile and three-sixteenth of that race, and most Preakness winners still would have won had the race been a sixteenth of a mile longer.

The best arguments against Dosage, though, are some of the horses who have failed to qualify. Dosage advocates crowed when Chief's Crown lost the 1985 Derby and Belmont, but the colt went on to win the Travers and the Mariboro Cup, both st a mile and a quarter. Bold Arrangement last year would have we the race had Ferdinand not found a sudden?

empty path on the rail. The 1978 Trig's Crown makes Dosage seem langhable. Affirmed had the proper numbers, Alydar did not. Had Affirmed not been around, Alydar would have won the Triple Crown easily

Alydar would nave work the traces. Interestingly, Alydar is the size of Alysheba, whose other genetic influences brought him in a whisker under the guidelines. Alydar's size, Raise a Native, is the source of plenty of trouble for the Dosage crew. Raise a Native also sired Mr. Prospector, the sire of Conquistador Cielo. and figures into the pedigrees of many horses whose numbers do not fit.

There is talk in Dosage circles that Raise a Native and his family may be reclassified on Roman's system, moved into a new category that would give their progeny better numbers. Sires are constantly being added and moved around in the system, and with enough tinkering Dosage will be able to continue its perfect record.

Dosage is fine insofar as it is an application. of common sense. Of course a son of Northern Dancer, Stage Door Johnny or Tom Rolfe has a better chance of winning a classic race than a colt from a long line of faint-hearted quitters. Go much beyond that, though, and the calculations become silly.

30.

St. 2017

SEBO

2.1

The numbers that matter in racing are the ones on the Teletimer and in the past performances in The Racing Form, not the arbitary ones that Roman assigns to a horse's greatgrandfather.

79.06 points, with rampant buying of blue chips in a long-awaited spate of bargain-hunt-

Dealers said they expected the Hang Seng index to hover around 2,775 to 2,825 points this week pending trading incentives.

London

up 2.50.

Hong Kong

The prospect of a June general election, the improved likelihood of a Conservative victory after the party's success in local elections and a fresh cut in British interest rates combined to send shares to new peaks last week on the London Stock Exchange.

The Financial Times industrial share index saw its sharpest one-day rise Friday to close 31.8 points higher on the week at 1.658.7, a new all-time high. The more widely based FT-SE index, measuring 100 leading shares, also im-proved on its previous record, ending 58 points nigher at 2,126.5.

Oil shares led the way, with double-figure gains for BP, Shell and Britoil on renewed British and overseas support. Consumer-related issues attracted strong de-

mand in response to the reduction in interest rates and excellent trading results from Marks & Spencer stores.

Milan

After nearly two months of buoyancy that, surprisingly, had coincided with the worst of taly's political crisis, Milan stocks declined sbarply last week. The Comit Index fell by 2.9 percent, to close Friday at 745.60. Many analysts attributed the downturn to a sudden mood of uncertainty ahead of the June Average daily turnover fell marginally to 46.23 million units. Total turnover for the week rose 20 percent to 231.6 million units, with turnover value increasing by 27 percent to 421.4 million dollars.

Tokyo

Tokyo stock indexes soared to record highs last week, after U.S. Treasury securities apparently met unexpectedly strong demand at auctions

There was no trading on Monday and Tues-day because of national bolidays, and the market was closed Saturday for a regular monthly recess.

The 225-stock Nikkei average closed Friday st a record 24,589.23 yen, for a weekly gain of 908. The previous record of 24,097.79 yen was set on April 22.

The TSE index of all common stocks listed on the market's first section, numbering 1,080, closed at an all-time high of 2,189.89 points, topping the previous mark of 2,171.97 points set on April 17.

A market analyst said interest in the market was now firmly centered on Japan's efforts to stimulate its domestic economy and related issues would almost certainly continue to do

Lurich

The Zurich stock exchange turoed higher last week, thanks largely to late-week gains by the dollar and purchase orders from foreign investors.

The Credit Suisse index advanced from 528.2 to 535.8, while the SBS index moved up from 621.7 to 633.6.

Banks and finance companies were the major gainers. Analysts detected a calmer tone to Zurich trading after the recent talks aimed at resolving a U.S. Japan trade dispute. They said the firmer trend should continue this week.

Braves Sweep Mets on Two-Out Pop-Up

Compiled by Our Staff From Disp ATLANTA - Albert Hall dou-

bled in the tying run Sunday when his pop-up to right field got lost in the sun, then scored the game-win-ning run on Rafael Ramirez's twoout single as the Atlanta Braves rallied to beat the New York Mets, 8-7.

That completed a three-game sweep for the Braves, their first over the Mets since April 22-24, 1983, and put New York's weekend record this year at 0-10. The loss dropped the Mets two games below 500, at 13-15, for the first time

Oilers and Flyers Take 2-1 Leads the Hard Way

United Press International DETROIT - The Edmontoo Oilers and the Philadelphia Flyers "You can't fault Shawn Burr behave taken 2-1 leads in their confer- cause the the puck bounced over ence finals of the National Hockey his stick."

NHL PLAYOFFS

League playoffs, but Marty McSorley, who scored with 36 seconds left in regulation time Saturday night to give the Oilers a 2-1 victory over the Detroit Red Wings, should not have been on the ice. When the Oilers' Glenn Ander-

son was given a high-sucking penalty and a 10-minute misconduct at 17:15 of the third period of the Campbell Conference final in the Stanley Cup competition, the man sent in to replace him was McSorley. And as the clock wound down,

he grahbed a loose puck that got away from the Red Wings' Shawn Burr and snapped off a shot that slipped between the pads of goalie

...

Greg Stefan. "I was tickled to be out there the last 30 seconds," said McSorley, whose normal role as a defensive right wing is to knock opponents off the puck, "I've never got this far in the playoffs before," he added. "They just called me up last year,

so this is a new experience for me. The pressure is new to me. The excitement is new to me." "Anderson goes off the ice for 12

minutes, they put McSorley out winner with 3:09 left in the contest.

and look what happens," said Detroit's coach, Jacques Demers,

When it was noted that McSorlev has seldom been an offensive threat, his coach, Glen Sather, replied, "I don't put him on the pow-er play, do l? But maybe tonight 1 should have."

Flyers 4, Canadiens 3: In Mootreal, in the Wales Conference final, Philadelphia had 21 fewer shots on goal than the home team, hut rockie goalie Ron Hextall made 36 saves, 19 during a critical first period.

Hextall was especially superb in that period, when the Canadiens stormed the net and outshot the Flyers by 21-8, taking a 2-0 lead when Chris Nilan and Chris Chelios scored 50 seconds apart in the opening 5:13.

Peter Zezel of the Flyers said that their coach, Mike Keenan, "didn't yell" at his players following the first period "but he made it known that we had to help Hexie. We could have been down 6-0. It was probably one of Ron's best games all year."

In the second and third periods. Pelle Eklund collected two goals and assisted on Rick Tocchet's goal, with Brian Propp scoring the

The Landscape **Of Irving Berlin**

By Stephen Holden New York Times Service NEW YORK — In a letter to Alexander Woolloott half a century ago, Jerome Kern offered what may be the last word on the significance of Irving Berlin, who is 99 years old today. "Irving Berlin has no place in American music," wrote Kern. "He is American music." And today that assessment still rings true, in spite of the fact Berlin has remained professionally silent for 25 years,

That quarter-century has seen profound changes in the way popular songs are created. Designed for records, modern pop music is now more of an aural than a written tradition. And American pop. instead of refining its own identity, is reaching out to Latin America. Africa and India for refreshment.

At the same time, Irving Berlio's songs sound as fresh today as when they were written. The latest reminder of the continuing vitality of Berlin's work is a new album, "Remember," by the superb young singer-pianist Michael Feinstein. "Remember" collects 19 Berlin songs that go as far back as "Alexander's Ragtime Band," the epochal hit that established his songwriting career in 1911 at the age of 23. Besides such Berlin standards as "How Deep Is the Ocean" (1932), "Always" (1925) and "Puttin" on the Ritz" (1930), it includes such relatively un-known gems as "What Chance Have 1 With Love?" from the 1940 show "Louisiana Purchase" and "Better Luck Next Time" from the 1948 movie "Easter Parade." The record is a delicious tribute from a singer whose heart-felt simplicity of delivery matches the spirit of the songs. The quality that Kern recog-

nized as the essence of Berlin is a faith in the American vernacular so profound that today the composer's best-known songs seem indivisible from the United States's history and self-image. Where the songs of Kern, George Gershwin, Richard Rodgers and Cole Porter brought together Afro-American, Latin American

and rural strains of pop with the elegance of European operetta, Berlin's music did not strive to be lofty in that way. The best of it is a simple, exquisitely crafted street song whose diction feels so natural that one scarcely notices the craft. Scanning Berlin lyrics, one rarely lingers over ironic turns of phrase, elaborately clever rhymes or double entendres. And his greatest melodies have a similar directness. For all of their innovation, they seem to flow straight out of the rhythms and inflections of everyday speech.

In contrast to many of his fellow pre-rock craftsmen, Berlin lacked a musical signature as distinctive as Porter's recurrent beguine rhythms. Harold Arlen's torchy blues melodies, or Gershwin's jazz harmonics. His ear absorbed many different voices from America's melting pot and blended them into songs that are as stylistically diverse as "Alexan-der's Ragtime Band," "There's No Business Like Show Busicess," "White Christmas" and "Let's Face the Music and Dance," These individual masterpieces are each so different from the others that one would not readily guess that they all came from the same hand. If they share a single quality, it is a bedrock adherence to a populist songwriting vocabulary that is steady in

tone and purged of ornament. Today's songwriters whose "Alexander's Ragtime Band" seemed in its time, one need only work embodies the American excontrast the song, with its exuber-ant syncopation and intense perience have followed Berlin's lead in using that populist vernacphysicality, with the two most ular. Bruce Springsteen combines an elemental rock-'n'-roll vocabupopular songs of the day, the senimental singalong "Let Me Call You Sweetheart" and the bucolic barbershop tune "Down by the ary with a powerful social real-istu. Stevie Wonder's primal pop-soul plea for peace and racial justice helped to make Martin Luther King Jr.'s birthday a national holiday, And Paul Simon's visionary fusions of American folk-rock 44 years later. with diverse international styles portray American pop as one vital element in an emerging world mu-

sic culmre. In today's music industry parlance, "Alexander's Ragtime Band" would be regarded as the prototypical "crossover" hit in its

ragtime into a Tin Pan Alley forequaled in sheer melodic memorability - by hundreds of theater The song revived the by-then composers ever since.

defunct art of ragtime," the music historian Edward Jablonski re-Discussing "White Christmas," in his book "American Popular marks in his notes for Feinstein's Song," Alec Wilder points out, "So many of Berlin's songs have album. "But Berlin will caution you, 'It is not a rag, it is a song about ragtime.' " To imagine just how radically jazzy and urbanized been played so often that it is easy to forget, bemused as one always is by all things familiar, the truly daring succession of notes in the chromatic phrase of the main strain of 'White Christmas' Lyrically, the song also evokes a primai nostalgia - a pure childlike longing for roots, home and childhood - that goes way beyond the greeting imagery."

Old Mill Stream." In fact, the "Let's Face the Music and impact of "Alexander's Ragtime Dance," written for the 1936 Fred Band" was roughly equivalent to Astaire-Ginger Rogers film "Folthat of "Rock Around the Clock" low the Fleet," is almost Cole Porter-like with its flowing, silky mel-"There's No Business Like Show Business," from the 1946 ody, which begins in a minor key and modulates dramatically into show "Annie Get Your Gun," a major key and then relapses. may be the ultimate uptempo Rarely have Berlin's melodies and show tune. Its tough wisecracking lyrics contained such ominous lyrics are as tersely all-knowing as its melody, which is nailed down undercurrents. Indeed, the song seems to anticipate the coming in brassy syncopated lines that world war with a mixture of anxi-

Irving Berlin, now. 99, whose sophisticated songs span the emotional terrain of the United States, in 1923 (left) and 1977.

Another of Berlin's gifts has been his ability to custom design songs for specific performers. There's No Business Like Show Business" will forever remain Ethel Merman's trademark. "Let's Face the Music and Dance" and "Cheek to Cheek" (the longest-running No. 1 hit of the 1930s) defined the musical personality of Fred Astaire, as their melodic lines followed the graceful, sweeping lines of his body in motion. The ultimate song to express

Berlin's deep American roots, "God Bless America," was first performed on Armistice Day in 1938 by Kate Smith on a radio broadcast, and it quickly went on to become an unofficial national anthem. This stirring pop march, composed at the end of the Depression, enshrines a strain of official patriotism intertwined with a religious faith that runs deep in the American psyche. Patriotic razzle-dazzle, sophisticated mel-ancholy and humble septiment: Berlin songs span the emotional terrain of America with a thoroughness that others may have

LANGUAGE Some Questions on Motherhood

tal estis tar an el regen el se

By William Safire

WASHINGTON — "My colleagues at U.S. News W& World Report and such learned journals as The New York Times." writes David E. Pollard. "keep referring to Mary Beth Whitehead as the surrogate mother of Baby M. I hold that she isn't a surrogate anything. I say she is the mother, As in real, actual, honest-to-God mother, For hire, maybe, But mother, nonetheless.

"And if society is going to insist that Mrs. Whitehead is the surrogate mother, then whatever shall we call Mrs. Stern, the wife of Baby M's father? Please

give us a roling." Surrogue, the noun derived from Latin, means "one who takes the place of another." In the 17th century, it was the name given to the deputy of an ecclesiastical judge; the bishop would let the surrogate handle the issuance of marriage licenses. That led to its use m admitalty law courts: a surrogate was appointed to act in place of a regular judge. This substitute judge stopped being a second-class judicial citizen when he was given jurisdiction over the probate of wills; an additional meaning was given to the judge in that field when he was considered to be acting as surrogate for, or in place of, the deceased parents of a minor.

The Russian novelist Ivan Turgenev liked the term criticizing a colleague's book: "In his eyes, art is (as he bimself expresses it) only n surrogate for reality, for life, and is essentially fit only for immature people." Surrogate became a bookish substitute for substitute, and was picked up by psychologists. A mother surrogate is one who takes the place of the mother in the child's mind: a female schoolteacher or older sister often takes on this role in the child's early life. The two words turned around in sequence when the psychologist Harry Harlow referred to the wire and cloth dolls that he used in the studies of maternal attachment in monkeys as surrogate mothers.

The word then hopped to politics. In the Nixon campaign of 1968, we were looking for an importantsounding word for the person who was asked to stand in for the candidate on occasions not important enough for the presence of the candidate himself. Substitute was pejorative; pinch-hitter, too informal; sland-in, too theatrical. But surrogate sounded vaguely legal and dignified, and we went with it. It caught on; people seemed more satisfied with "one of Mr. Nixon's team of surrogate speakers" than with a miserable substitute.

UN June 5, 1978, Time magazine wrote about a new idea of implanting a fertilized egg or embryo in the womb of a woman different from the one in whom conception took place: "The demand for surrogates remained strong. . . Despite potential legal prob-lems, some have already opted for surrogate mothers." Thus the phrase, with this new meaning, was started, and the potential legal problems soon became real. The Supplement to the Oxford English Dictionary took that Time usage as the basis for its definition: "A woman whose pregnancy arises from the implantation in her womb of a fertilized egg or embryo from another woman." But that, of course, does not apply

to the case of Mary Beth Whitehead, whose own egg was artificially inseminated.

increase in frequency of the new practice. No longer was the woman who provided the uterus the only one given that label: the woman providing the egg was also referred to as the surrogate, or substitute.

1. 0)

- -

That was an anomaly, promptly objected to by opponents of the procedure; they held that Mrs. Whitehead, who was present at the conception, was the mother (or natural or genetic or biological or real mother), and that the woman who with her husband had contracted to adopt the child was the child's surrogate (or faster or adoptive) mother.

The Vatican condemned all such end runs around infertility: "Surrogate motherhood . . . offends the dignity and the right of the child to be conceived, carried in the womb, brought into the world and brought up by his own parents. The Vatican did not differentiate between the process of implanting a fertilized egg in a rented or borrowed womb and the process of impregnating the hired child-bearer by fertilizing one of her own eggs.

That exemplifies the linguistic confusion. Surrogact is now most often taken in its most inclusive sense, seen and spoken of to mean "the business of arranging for a baby to be produced in the body of a woman other than the female partner in a marriage." The crucial difference made by the place of the eggs fertilization is usually overlooked: wombs for ren1 and eggs for purchase, quite different situations, are lump-ed together in the whole field, or issue, called surrogate herhood

What, then, does the person who wants to be linguistically precise call the woman who is the genetic female parent and also the bearer of the child? Logic suggests the answer to be, simply, the mother, but strict logic does not rule the language. In current use, that woman is part of the surrogacy movement (or trade, if you disapprove), and as such is called the surrogate wher.

It's too soon for a "ruling"; current usage is clearly on the side of calling the hired currier the surrogute, but a backlash may be developing. I would stick to the facts: if you mean the woman who provides the egg alone, use genetic mother; if she provides the uterus without the egg, try uterine mother; if she provides both egg and uterus, try genetic, childbearing mother or, if you want to sneak in a little propaganda, natural mother

As for the other woman, the one contracting for the child's delivery. if she provides no egg, she is the adoptive mother, and would probably prefer that more recent modifier to foster (from Old English for "food, nourishment"). If she bas custody, she can also be called the legal mother.

Least desirable is srepmother, which still carries the unfair "wicked" connotation: as Mary Beth White-head said in her failed custody attempt, "I do not want to be known as a stepmother. I want to be a legal mother." In Merriam-Webster's Ninth New Collegiate, stepchild is defined as "I: a child of one's wife or husband by a former marriage 2: one that fails to receive proper care or attention." Srep-siblings may be considered to refer reciprocally to children of a later or former marriage, and step- is more inclusive than half-; which requires being related by blood through one.
